The indexing companion first published in 2007 gives an overview of indexing for professional indexers editors authors librarians and others who may be called upon to write contribute to edit or commission an index it covers basic principles as well as examining controversial areas it is based on publishing standards textbooks and the consensus of the indexing community gained from participation in various mailing lists it discusses a wide range of document formats and subjects that require indexing as well as dipping into new topics on the edge of indexing such as folksonomies and the semantic web some people consider indexing to be a dry topic at the end of this book people should be thinking of indexing as a challenging and rewarding profession
