who the real invaders truly are marilyn s life has been a series of challenging experiences not unlike most of the human population early on she felt disconnected and alone even in her own family her artful heart never gave up she studied many religions philosophies and the ideas of the great thinkers by the 1990s she was formulating her life as only the artistic heart can do from sculpture to charcoal drawing to poetry singing and journaling she found a place inside that she could connect to and a feeling of freedom to be herself the inspiration comes from her children her ideals and her profound interest in humanity and the course of events that continue to alter and affect her direction persistence has become her motto gratitude her daily practice and a pointed focus on the minutiae of energy that allows change into each day lazarus sheffield is a man without a planet by the time he meets lindsey in route to the heaven s gate space station lindsey quickly determines the nervous man sitting next to her is a high ranking government official on the run from one of history s most repressive governments the totalitarian theocracy otherwise known as the north american federation she decides to help him and introduces lazarus to some of luna s finest citizens so begins the shadow war trilogy evolution s child earthman is book one of the shadow war trilogy the republic of luna is an ongoing saga about the trials and tribulations of humanities first extraterrestrial nation evolution s child earthman covers the lunarian timeline from late october to early november in the year 2092 angel evolution the first book in the young adult fantasy trilogy the evolution trilogy when taylor meets gabriel at college she is in awe of the subtle glow that surrounds him no one else not even her best friend seems to notice something about him scares her is all as it appears while taylor struggles for answers she finds herself in the middle of a century old war centered on one miraculous revelation evolution there is a period in human evolution in which the normal course of mutations no longer controlled the development of the human species this is the story of that era although it had become a commonly accepted concept that the future of mankind was off the planet it took the single minded dedication of one person to completely change the course of the history of life on earth to ensure its future existence the species is re engineered in preparation for its exodus there is only one solution to migrate out of the physical body into a digital existence as an interim step technically engineered individuals tengi were developed by lai xii and her company her experimental city population became people with biological computerised implants and body parts which led that technology to an ultimate dead end a human brain sustained and augmented by bio mechanical components created more problems than solutions however the advent of sophisticated quantum computing paved the way for the next logical development the crux of the plan was to speed up evolution to the point where the minimum amount of data was required to digitise the human brain and the mind that dwelt within it virtual reality constructs through social media entertainment became the ideal acclimatisation tools to prepare humanity s launch into space and onto a jovian moon to a computer installation on europa in the second installment of our trilogy north and south egypt are on the cusp of war a host of gods and goddesses choose sides horus travels through time to defeat his uncle and save his love he learns lessons of love and war from some of the greatest men in history witness the evolution of horus from king to god will he be able to unite egypt before the nation is ruined by civil war steven thorn has had a nightmare year he finds out he is not normal his life gets erased he starts a new life in the amazon and then he ends up with a debilitating injury life could not get any worse he thinks yet luck is on his side as his injury leads to freedom and his eventual return to southampton his new home is a victorian house on the outskirts of southampton to replace his old home

caitlin chance now that he is back he intends to find a way into her life but he has no idea if she will even remember him caitlin is about to discover the reason for her unexplained sadness over the past year and will find it hard to resist steven s magnetic pull she has never been good at avoiding things that are bad for her and the return of steven is about to challenge her willpower in an unimaginable way as begun in hybrid vanessa wester takes you back to the university of southampton to reveal more twists and turns in the evolution trilogy life is full of complications and sometimes it is hard to know if you made the right choice i was totally hooked by page 10 and literally could not turn the pages quickly enough towards the end the characters are much more developed in this second book and the storyline is fascinating caitlin still remains my favourite character and i hope to see more of her i cannot wait for the third book and find out what happens catherine a brilliant sequel to hybrid this novel followed on well in story and character i read the entire book in one sitting when i was meant to be sleeping as it had me gripped the whole way through roll on number 3 i await with baited breath silk we learn a lot about steven and his family move successfully from the amazon back to england where steven thinks he belongs and watch him attempt to get the girl he loves he has changed though and has powers he is not fully aware of he starts to understand these powers a little bit better as he tries to get caitlin back she is a little stubborn but he is determined to be with the only girl he ever loved no matter what as caitlin begins to remember him and they spend time together rekindling their love events happen that are going to change their lives forever so many things just happened to steven and caitlin so much to think about love the ending of this book susan vanessa wester has done a fantastic job with this and i enjoyed every bit of it the story flowed well and with a few twists in the story vanessa keeps you on edge i loved the characters especially the mc steven a well deserved 5 stars and i cannot wait to read the last book in this brilliant trilogy lara complications has some scenes of an adult nature it may be considered unsuitable for younger readers the evolution trilogy continues with return you can also find out more about steven s mother in the prequel emily a great set of books a must read for all imaginative story somehow believable i would like to visit the community myself lovely lane visit theevolutiontrilogy.blogspot.com to find out more does everyone deserve a happy ending giselle moore has been through a lot in her short life but things are looking up her premier art showing in new york city is on the horizon she has been reunited with her family and most of all she is deeply in love with the mysterious frenchman she met on vacation in mexico there is only one thing that could derail her happiness and that is her guilt over her forbidden relationship with sinclair after finally confessing their love for each other the two decide to travel to paris france where they may begin to discover what it really means to be together when a terrible family accident beckons them back home the return of a sinister man from the past crumbling business deals and a family that has turned against them tests their fledgling romance and the very idea that they could possibly live happily ever after they were created to save humanity now they must fight to save themselves the complete evolution series by stephanie saulter for years the human race suffered from a deadly syndrome but when a cure was found in the form of genetically engineered human beings gems the line between survival and ethics was radically altered now the gems are fighting for their freedom from the oppression of the companies that created them and against the norms who see them as slaves and a conference at which dr eli walker has been commissioned to present his findings on the gems is the key to that freedom but with the gemtech companies fighting to keep the gems enslaved and the horrifying godgangs determined to take over the earth everything you need to

creations the gems are up against forces that may just be too powerful to oppose some books are good some books are even great this one is important signal on binary utterly fascinating the modern creation trilogy is the definitive work on the subject and a must for anyone interested in the study or origins read about the easy capitulation by theologians confronted with charles darwin s evolutionary theories or the mysterious babylonian creation story enuma elish find out what the bible says about dinosaurs noah s flood and christ s firm acknowledgement of the importance of genesis this project covers all the bases and as a beautifully bound set makes the perfect gift for believers and even unbelievers volume one scripture creation 232 pages evidences found throughout the bible for special creation volume two science creation 343 pages examines only the scientific facts volume three society creation 208 pages the effects on society of a pervasive evolutionary philosophy 3 vol gift boxed set free cd rom book two tempel dugan leads a company of lunarian warriors against impossible odds they call themselves quan kiai these young warriors and a few more like them are all that stands between the republic of luna and total annihilation so begins book two of the shadow war trilogy evolution s child lunarian is book two of the shadow war trilogy the republic of luna is an ongoing saga about the trials and tribulations of humanities first extraterrestrial nation evolution s child lunarian covers the lunarian timeline in early november in the year 2092 book three the republic of luna is teetering at the point of collapse when the lunarian general council commits their last hope they send quan kaia and the remaining lunarian warriors against the brotherhood fight or die they fight in their great underground cities they fight cross the surface of the moon and they fight in orbital space earth and luna become locked in humanities first interplanetary war the shadow war book three of the shadow war trilogy evolution s child thread is book three of the shadow war trilogy and part of the republic of luna an ongoing saga about the trials and tribulations of humanities first extraterrestrial nation evolution s child thread covers the lunarian timeline from november through the year 2092 to survive they must evolve the walker crew has survived despite an alien invasion and the chaos it created even better they ve managed to keep the device that might protect them from what happens next but a terrible calamity is coming only a few will survive and the device has room for only two people worse their alien pursuers won t give up that easily they re willing to use all the resources of their armada to stop the humans from foiling their plan if they re going to survive they ll need to evolve but evolution isn t for everyone evolution is the third and final book in the avery blake and vered ehsani series the next evolution discover your new favorite scifi series today to conclude his soul mosaical art of mind trilogy philosophopoet of inner and outer spaces original clyde aidoo goes e evolutionary and re evolutionary with a saga of perceptual growth remembered love lived and relived his story her story and pre story in which the ultimate becomes truly intimate in a welter of passion struggle and hope plunge in and let it wring your heart dry and resurrect it to beat with forever new eyes and song is it possible to keep a life changing secret from your family and friends when it is burning you alive from the inside out one week it didn t seem possible that a person could change in one week yet after only seven days spent with the mysterious frenchman in los cabos mexico giselle was moving to new york city a changed woman confident sexy and in charge elle is ready to take on the challenges she knows await her when she reunites with her family and begins her career as an artist in earnest if she is a little heartbroken at the prospect of never seeing the cool and dominating sinclair again she s braced for it that is until sinclair shows up in her mother s kitchen and giselle discovers just who his darling girlfriend really is

steven thorn and caitlin chance are meant to be together at least when they first fell in love it seemed inevitable but love is sometimes not enough it makes them act irrationally it tests family loyalties breaks and makes friendships and causes physical and mental pain yet without love steven and caitlin are lost as they return to the community and discover the possibilities open to them all is not what they hoped steven has impacted the lives of many since he was discovered and the choices he made have led to events beyond anyone s control love brought steven and caitlin together and fate is playing with their emotions constantly undermining their willpower and

determination in the game of love destiny is always the winner as continued from complications vanessa wester takes you back to the amazon as steven and caitlin return to the community and try to figure out their future finally you will discover the next steps for the community its inhabitants and humanity the evolution trilogy was so much fun to read all the components of a good series are there and i found myself thinking about the characters constantly for me that is the sign of a good book i can t get the characters out of my head they come to work and the gym with me and i try to figure out what will happen next i fell in love with caitlin and steven the main characters in hybrid joined in on their adventures in complications and was rewarded with a finale that tied up all of the details and loose ends in return book 3 there are a lot of twists and turns in return as caitlin and steven learn to deal with some very tragic news and come to terms with what they have become and will forever be they go back to the safety of the home in the amazon shared by the others like them they are not welcomed by all however and are kept in confinement and hidden for their safety slowly caitlin s charms start to win over the sceptics she also finds out that she has something very important to offer the community and learns a lot about herself along the way a very satisfying ending i highly recommend this trilogy susan a great set of books a must read for all imaginative story somehow believable i would like to visit the community myself lovely lane really enjoyed all 3 books find them so readable and hard to put down as soon as you start reading you feel involved in the story julie return has some scenes of an adult nature it may be considered unsuitable for younger readers you can also find out more about steven s mother in the prequel emily emily is one of the main supporting characters in the evolution trilogy which is one of the few trilogies that i can truly say i couldn t wait to finish and hated finishing all at once i knew i wanted the entire trilogy by the time i wasn t even half way through book one hybrid the entire series including this novella the realistic and relate able characters the rich environments and the variety of real life scenarios interwoven with the outrageous and the paranormal made these books a series on my love to read list that i will always support and recommend to others without adding spoilers this prequel novella can work as a stand alone read or in addition to the trilogy and you understand emily so much better and why her actions and attitude seem to change with a whim what would you do if a change beyond your control took everything away from you and then you were taken away from everything you knew and loved no one knows until they are in that situation after years emily is finally allowed to return to the place she loved but so much time has passed and so many things have changed that it s all new the story is heart wrenching and beautiful all at once another solid story from the amazing mind of vanessa wester my book fairyvisit theevolutiontrilogy.blogspot.com to find out more

steven thorn is about to learn that his life is not going to be straightforward before he does he meets caitlin and discovers the irrational attraction of first love however when everything becomes complicated will love be enough regardless of what he is and where his loyalty

should lie a decision has to be made rules are meant to be broken from the university of southampton to the depths of the amazon jungle in brazil steven and caitlin will discover that in the game of love destiny is always the winner while i ll be sad to see it go how thrilled i am to have any sort of melancholy feeling about saying goodbye to characters i ve worried over and rooted for so long the truth is that i ve been rather disappointed in the final book in trilogy series of late so it means something to me that ms wester has taken great care not to make a cookie cutter everyone gets everything they want in the end final book nor does she envision the alternate gloomy world which has also plagued trilogies of late allegiant or mockingjay anyone as a matter of fact ms wester derives a way to both answer our must know questions while also leaving a decent bit to our imaginations an approach i appreciated and one that will no doubt lead me towards reviewing more of this talented author s work in the future lydia via goodreads

there is a period in human evolution in which the normal course of mutations no longer controlled the development of the human species this is the story of that era although it had become a commonly accepted concept that the future of mankind was off the planet it took the single minded dedication of one person to completely change the course of the history of life on earth to ensure its future existence the species is re engineered in preparation for its exodus there is only one solution to migrate out of the physical body into a digital existence as an interim step technically engineered individuals tengi were developed by lai xii and her company her experimental city population became people with biological computerised implants and body parts which led that technology to an ultimate dead end a human brain sustained and augmented by bio mechanical components created more problems than solutions however the advent of sophisticated quantum computing paved the way for the next logical development the crux of the plan was to speed up evolution to the point where the minimum amount of data was required to digitise the human brain and the mind that dwelt within it virtual reality constructs through social media entertainment became the ideal acclimatisation tools to prepare humanity s launch into space and onto a jovian moon to a computer installation on europa
