the admiration of science and technology and the emphasis on political stability are two sides of the same coin in china therefore china is more likely to take aggressive measures to promote or inhibit platform development than the united states and the european union but the uncertainty in the decision making process is worrisome and calls for a broader discussion of the multiple political consequences of technology environmental kuznets curve ekc a manual provides a comprehensive summary of the ekc summarizing work on this economic tool that can analyze environmental pollution problems by enabling users to reconcile environmental and economic development policies environmental kuznets curve studies lend themselves to the investigation of the energy growth and finance energy nexus the book obviates a dependence on outmoded tools such as carrying capacity externalities ecosystem valuation and cost benefit analysis while also encouraging flexible approaches to a variety of challenges provides a comprehensive summary of ekc studies including advances in econometrics literature reviews and historical perspectives outlines solutions to common problems in applying ekc techniques by reviewing major case studies explores frequently utilized proxies for environmental quality what made it possible for the human species to conquer the world build a global digital economy and still want more what drives technological progress and economic growth in the long run and on a global scale and how will technological progress economic growth and the overall prosperity of human civilization unfold in the future this book sheds new light on these big questions by incorporating findings from physics anthropology psychology history philosophy and computer science in a brand new theory of economic growth looking back across the millennia it identifies five major technological revolutions which have transformed humankind s capacity to process energy and information the cognitive agricultural scientific industrial and digital revolutions and characterizes the new avenues of economic development which they have opened while also exponentially accelerating growth mahout for years north carolina has been one of the nation s fastest growing states bringing tremendous change to the state s people industries jobs places environment and government much of this change resulted from the information and technology revolution which connected the state more fully to the country and the world but we are now moving beyond the connected age argues michael l walden to a new era of living production and work and north carolina faces not only unanswered questions about the past but also new challenges and opportunities visible on the horizon what will these new transformations mean for the state s people places and prosperity in this book walden lays out these looming economic issues and offers predictions of future trends as well as multiple policy options for taxation infrastructure and environmental issues while the future cannot be perfectly predicted walden s expert analysis is mandatory reading for policy makers business leaders and everyday people seeking to prepare for upcoming changes in north carolina s economy the role of cognitive and socioemotional skills alongside education in determining people s success in the labour market has been the topic of a growing body of research but previous studies have mostly missed middle income countries and the developing world because measures of those skills and data on employment and earnings on large enough samples of adults have typically not been available using comparable survey data on these schooling skills and labour market outcomes from 13 developing and emerging economies worldwide this book revisits human capital and gender inequality models it presents new estimates of the returns to different levels of schooling as well as cognitive and socioemotional skills for women and men it examines whether those returns are due to levels of human capital or to structural bias in labour markets and how these two factors work across the earnings spectrum the book examines the existence of glass ceilings and sticky floors for women using this expanded measure of human capital further by analyzing a group of countries of wide ranging levels of economic development and socio political contexts the book reveals patterns and insights into how context mediates the relationship between skills and gender gaps in labour market outcomes this book will be of interest to scholars of human capital and gender inequality in the labour market and development economics as well as gender and development policy makers this proceedings book presents the outcomes of the vii international scientific conference digital transformation of the economy challenges trends new opportunities which took place in samara russian federation on april 26 27 2019 organized by the samara state university of economics the conference chiefly focused on digital economy issues such as theoretical preconditions for the development of economic systems in the digital age and specific practical issues related to real world business practice consisting of six chapters corresponding to the thematic areas of the conference and written by scientists and practitioners from different regions of russia kazakhstan the czech republic and germany the book offers answers to the most pressing questions for today s business community how is our world changing under the influence of digital technology is sustainable economic development a myth or reality in the context of digitalization what threats and opportunities does digitalization bring what are realities and prospects of digitalization in the context of business practice how do we create a digital infrastructure for the economy how should the legal environment of the economy be transformed in the context of digitalization the conclusions and recommendations presented are not recipes for solving the existing economic problems but instead are intended for use in further research on transformation processes in the economy and in the development of state economic policies in various countries and regions this report describes the construction of the database of skill needs indicators i e the oecd skills for jobs database and presents initial results and analysis the collapse of communism in central east and south east europe cesee led to great hopes for the region and for europe a quarter of a century on the picture is mixed in many cesee countries the transformation process is incomplete and the economic catch up has taken longer than anticipated the current situation has highlighted the need for a better understanding of the long term political and economic implications of the central east and south east european historical experience this thematically organised text offers a clear and comprehensive guide to the economic history of cesee from 1800 to the present day bringing together authors from both east and west the book also draws on the cutting edge research of a new generation of scholars from the cesee region presenting a thoroughly modern overview of the history of the region the text will be invaluable to students of economic history and cesee area studies this book examines the links between climate change and resource scarcity to violent conflict does climate change cause conflicts this

book analyses the economic political and social conditions under which countries with low levels of freshwater or arable land experience armed conflict there are strong theoretic arguments linking climate change and scarcity of livelihood resources to conflict however empirical accounts are contradictory using qualitative comparative analysis fsqca this book compares 22 political economic and social conditions across 30 countries experiencing scarcity of available freshwater or arable land the results show that there are three types of resource scarce countries that experience conflicts neo patrimonial states oil rich states that are poorly integrated into the global economy and least developed states in addition the results reveal that there are two types of resource scarce countries that remain peaceful non agrarian countries with either even development between groups or high integration into the global economy with high levels of adaptive capacities this explains the contradictory results of previous empirical studies and suggests that resource scarcity might contribute to conflict in least developed countries this book will be of much interest to students of climate change critical security peace and conflict studies and ir in general

the science policy interface is critical to the design and implementation of water policies in theory scientists provide policy makers with robust facts and data that can help guide decision making and lessons from the political economy of reforms can push scientific boundaries further to trigger further research for wise solutions while evidence based policy is obviously desirable in practice such a connection is not always straightforward another assumption behind the science policy gap is the discrepancy between scientists and policy makers in terms of culture process timing language and expected outcome this book tries to reconcile this discrepancy through a multi stakeholder approach to authoring its different articles this joint initiative between the oecd particularly its water governance initiative and the international water resources association seeks to provide a canvas for grounding water policy in science and vice versa the objective of this book devoted to the oecd principles on water governance is to use the oecd principles as a common thread across the articles to draw lessons from theoretical work and practical experiences in water governance reforms but also to only feature papers authored by groups of diverse stakeholders from different institutional backgrounds this book was originally published as a special issue of water international this book uses new empirical data to test how social capital works in different societies with diverse political economic and cultural institutions taking a comparative approach this study focuses on data from three very different societies china taiwan and the united states in order to reveal the international commonalities and disparities in access to and activation of social capital in labor markets in particular this book tests whether political economic and cultural differences between capitalist and socialist economic systems and between western and confucian cultures create different types of individual social networks and usages abstract the conference aimed to identify nordic and global future of work trends including new forms of work and new technologies and production models resulting from digitalization it pointed to challenges of ensuring adequate protection employment opportunities and safeguarding competitiveness in the nordic region amidst rapid technological and demographic changes as policy responses speakers identified the need to invest in education and skills to update policies legislation and collective agreements to better respond to the future labour market furthermore they emphasised that social protection should have a broad coverage and encourage active labour market participation global cooperation labour standard and social dialogue are needed to promote decent work last but not least gender equality is an important principle and policy goal also for the future ilo work this report identifies effective strategies to tackle skills imbalances in italy

are mass violence and catastrophes the only forces that can seriously decrease economic inequality to judge by thousands of years of history the answer is yes tracing the global history of inequality from the stone age to today walter scheidel shows that inequality never dies peacefully inequality declines when carnage and disaster strike and increases when peace and stability return the great leveler is the first book to chart the crucial role of violent shocks in reducing inequality over the full sweep of human history around the world ever since humans began to farm herd livestock and pass on their assets to future generations economic inequality has been a defining feature of civilization over thousands of years only violent events have significantly lessened inequality the four horsemen of leveling mass mobilization warfare transformative revolutions state collapse and catastrophic plagues have repeatedly destroyed the fortunes of the rich scheidel identifies and examines these processes from the crises of the earliest civilizations to the cataclysmic world wars and communist revolutions of the twentieth century today the violence that reduced inequality in the past seems to have diminished and that is a good thing but it casts serious doubt on the prospects for a more equal future an essential contribution to the debate about inequality the great leveler provides important new insights about why inequality is so persistent and why it is unlikely to decline anytime soon building on contemporary efforts to theorize conflicts related to borders migration and belonging this book transforms existing analyses in order to propose critical interventions the chapters are written from multiple disciplinary perspectives and present rigorous empirical and theoretical analyses to advocate progressive transformation according to the european commission two recent policies the digital service act and the digital market act will allow for the regulation of a significant part of the eu digital single market dsm to an extent similar to the creation of the traditional internal market in the early 1990s the provisions are intended to improve conditions in the eu dsm to ensure that the market is as free and fair as it is safe for users of the digital economy this interdisciplinary book analyses the impact of digital technologies on specific markets and more broadly the society and the economy it identifies and assesses the different features challenges trends and dimensions of the eu dsm from a legal and economic viewpoint and also from a polish perspective poland is presented as one of the eu countries participating in the creation of the eu dsm and is analysed alongside the average as well as the best and the worst performing eu member states and compared with other non eu members the book addresses several broad areas in which the implications of digitalisation are particularly visible and which are important to the average person giant online platforms freedom of speech e commerce digital levy energy infrastructure and the labour market the authors have presented opportunities and threats related to the functioning of the digital market these opportunities and threats are typical of highly developed countries while reflecting the specific features of the

riddled with ever increasing complexity as we are faced with more frequent and intense shocks such as covid 19 unfortunately addressing complexity requires a different kind of economic governance there is increasing pressure on economics to not only going beyond its traditional mainstream boundaries but also to tackle real world problems such as fostering structural change enhancing sustained growth promoting inclusive development in the era of the digital economy and boosting green growth while addressing the divide between the financial sector and the real economy this book demonstrates how to apply complexity science to economics in an effective and instructive way in the interest of life enhancing policies the book revolves around the non negligible problem of why economics to date seems to be inadequate in guiding economic governance to navigate through real and ever intensifying complex socio economic and environmental challenges with its interdisciplinary approach the book scans the nuanced nexus between complexity and economics by incorporating as well as transcending the state of the art literature it identifies ways to trigger opportunities for behavioural change in the economic profession with respect to how and what to teach introducing and developing further complexity economics taking into account the configuration of its main principles and outlining the silhouette of next generation economic governance the book deciphers recommendations for economic theory practice education and economic governance it will be of interest to students scholars publications brilliant and engagingly written why nations fail answers the question that has stumped the experts for centuries why are some nations rich and others poor divided by wealth and poverty health and sickness food and famine is it culture the weather geography perhaps ignorance of what the right policies are simply no none of these factors is either definitive or destiny otherwise how to explain why botswana has become one of the fastest growing countries in the world while other african nations such as zimbabwe the congo and sierra leone are mired in poverty and violence daron acemoglu and james robinson conclusively show that it is man made political and economic institutions that underlie economic success or lack of it korea to take just one of their fascinating examples is a remarkably homogeneous nation yet the people of north korea are among the poorest on earth while their brothers and sisters in south korea are among the richest the south forged a society that created incentives rewarded innovation and allowed everyone to participate in economic opportunities the economic success thus spurred was sustained because the government became accountable and responsive to citizens and the great mass of people sadly the people of the north have endured decades of famine political repression and very different economic institutions with no end in sight the differences between the koreas is due to the politics that created these completely different institutional trajectories based on fifteen years of original research acemoglu and robinson marshall extraordinary historical evidence from the roman empire the mayan city states medieval venice the soviet union latin america england europe the united states and africa to build a new theory of political economy with great relevance for the big questions of today including china has built an authoritarian growth machine will it continue to grow at such high speed and overwhelm the west are america s best days behind it are we moving from a virtuous circle in which efforts by elites to aggrandize power are resisted to a vicious one that enriches and empowers a small minority what is the most effective way to help move billions of people from the rut of poverty to prosperity more philanthropy from the wealthy nations of the west or learning the hard won lessons of acemoglu and robinson s breakthrough ideas on the interplay between inclusive political and economic institutions why nations fail will change the way you look at and understand the world this collection written The European Union Digital Single Market 2022-07-15 brilliant and engagingly written why nations fail answers the question that has stumped the experts for centuries why are some nations rich and others poor divided by wealth and poverty health and sickness food and famine is it culture the weather geography perhaps ignorance of what the right policies are simply no none of these factors is either definitive or destiny otherwise how to explain why botswana has become one of the fastest growing countries in the world while other african nations such as zimbabwe the congo and sierra leone are mired in poverty and violence daron acemoglu and james robinson conclusively show that it is man made political and economic institutions that underlie economic success or lack of it korea

to take just one of their fascinating examples is a remarkably homogeneous nation yet the people of north korea are among the poorest on earth while their brothers and sisters in south korea are among the richest the south forged a society that created incentives rewarded innovation and allowed everyone to participate in economic opportunities the economic success thus spurred was sustained because the government became accountable and responsive to citizens and the great mass of people sadly the people of the north have endured decades of famine political repression and very different economic institutions with no end in sight the differences between the koreas is due to the politics that created these completely different institutional trajectories based on fifteen years of original research acemoglu and robinson marshall extraordinary historical evidence from the roman empire the mayan city states medieval venice the soviet union latin america england europe the united states and africa to build a new theory of political economy with great relevance for the big questions of today including china has built an authoritarian growth machine will it continue to grow at such high speed and overwhelm the west are america s best days behind it are we moving from a virtuous circle in which efforts by elites to aggrandize power are resisted to a vicious one that enriches and empowers a small minority what is the most effective way to help move billions of people from the rut of poverty to prosperity more philanthropy from the wealthy nations of the west or learning the hard won lessons of acemoglu and robinson s breakthrough ideas on the interplay between inclusive political and economic institutions why nations fail will change the way you look at and understand the world
