United States of America V. Trigg 1967

this textbook offers the opportunity to create a uniquely engaging combinatorics classroom by embracing inquiry based learning ibl techniques readers are provided with a carefully chosen progression of theorems to prove and problems to actively solve students will feel a sense of accomplishment as their collective inquiry traces a path from the basics to important generating function techniques beginning with an exploration of permutations and combinations that culminates in the binomial theorem the text goes on to guide the study of ordinary and exponential generating functions these tools underpin the in depth study of eulerian catalan and narayana numbers that follows and a selection of advanced topics that includes applications to probability and number theory throughout the theory unfolds via over 150 carefully selected problems for students to solve many of which connect to state of the art research inquiry based enumerative combinatorics is ideal for lower division undergraduate students majoring in math or computer science as there are no formal mathematics prerequisites because it includes many connections to recent research students of any level who are interested in combinatorics will also find this a valuable resource

Inquiry-Based Enumerative Combinatorics 2019-06-28

health and biomedical informatics is a rapidly evolving multidisciplinary field one in which new developments may prove crucial in meeting the challenge of providing cost effective patient centered healthcare worldwide this book presents

the proceedings of medinfo 2015 held in são paulo brazil in august 2015 the theme of this conference is ehealth enabled health and the broad spectrum of topics covered ranges from emerging methodologies to successful implementations of innovative applications integration and evaluation of ehealth systems and solutions included here are 178 full papers and 248 poster abstracts selected after a rigorous review process from nearly 800 submissions by 2 500 authors from 59 countries the conference brings together researchers clinicians technologists and managers from all over the world to share their experiences on the use of information methods systems and technologies to promote patient centered care improving patient safety enhancing care outcomes facilitating translational research and enabling precision medicine as well as advancing education and skills in health and biomedical informatics this comprehensive overview of health and biomedical informatics will be of interest to all those involved in designing commissioning and providing healthcare wherever they may be
