as a sewing machine repair person for over twenty five years i ve seen almost every problem that can happen with your home sewing machine i ve seen people so frustrated with their new found treadle sewing machine that they were ready to set it aside for looks only just because they couldn t figure out how to use or operate it normally the old treadles no longer have instruction books with them therefore it s up to the owner to try to figure things out even a basic thing like putting on a new belt is an impossible task when you don t know where to begin and what steps to take to get it in the right position and secured properly if you stop and think about it the treadle machine is the machine all sewing machines of today were modeled after the electric motor was added to take the place of the foot power of the treadle machines the shuttle was changed from the bullet style to the present style of a small round flat shuttle directly under the feed dog and needle bar i ve had many requests to try to locate an instruction manual for treadle sewing machines to no avail after years of request after request for information on treadle sewing machines i was finally talked into writing a book of general instruction for the treadle machine keep in mind that there are many different styles brands and manufacturers of treadle sewing machines and some are made in other countries with that in mind i could not include each of them specifically and cover the small differences they each may have therefore this book is written in a generic style so that the information could be applied to any treadle machine

traje the brightly colored traditional dress of the highland maya is the principal visual expression of indigenous identity in guatemala today whether worn in beauty pageants made for religious celebrations or sold in tourist markets traje is more than mere cloth it plays an active role in the construction and expression of ethnicity gender education politics wealth and nationality for maya and non maya alike carol hendrickson presents an ethnography of clothing focused on the traje particularly

women's traje of Tecpán Guatemala: a bi-ethnic community in the central highlands. She covers the period from 1980 when the recent round of violence began to the early 1990s when Maya revitalization efforts emerged using a symbolic analysis informed by political concerns. Hendrickson seeks to increase the value accorded to a subject like weaving which is sometimes disparaged as craft or women's work. She examines traje in three dimensions as part of the enduring images of the Indian as an indicator of change in the human life cycle and cloth production and as a medium for innovation and creative expression. From this study emerges a picture of highland life in which traje and the people who wear it are bound to tradition and place yet are also actively changing and reflecting the wider world. The book will be important reading for all those interested in the contemporary Maya, the cultural analysis of material culture and the role of women in culture preservation and change.

Treadle pump (TP) technology has been promoted by Enterprise Works Worldwide (EWW) as an alternative to the traditional rope and bucket irrigation that is necessary to overcome the challenge of uncertain and inadequate rainfall for agricultural production. The aim is to improve output, increase incomes, and reduce poverty among farm households. This study examines the strategies used for dissemination of the TP and the dynamics of its adoption and impacts with a special focus on poverty reduction. The results of the study reveal that time and labor savings for irrigation, increased size of irrigated areas, and lack of fuel requirements are the attractive features of the TP for those who adopt it. Adoption of TP increases land and labor productivities and also net farm incomes. The study also demonstrates that adoption of the TP reduces poverty.
