1974

this book reflects the paradigm shift now manifesting in bangladesh s education system by highlighting recent empirical research it shares essential insights by presenting research conducted on diverse aspects of current day education in bangladesh including policy and governance equity access and participation curriculum and pedagogy assessment and education programs and projects run by ngos further it offers a platform for these unique studies to be showcased and disseminated to scholars and researchers from developing and developed countries alike and represents a unique reference resource for the education research community in bangladesh asia and all over the world with foreword from professor serajul islam choudhury

Apollo-Soyuz Test Project

1977

over the last twenty years automation and robotics have played an increasingly important role in a variety of application domains including manufacturing hazardous environments defense and service industries space is a unique environment where power communications atmospheric gravitational and sensing conditions impose harsh constraints on the ability of both man and machines to function productively in this environment intelligent automation and robotics are essential complements to the capabilities of humans in the development of the united states space program robotic manipulation systems have increased in importance as the complexity of space missions has grown future missions will require the construction maintenance and repair of large structures such as the space station this volume presents the efforts of several groups that are working on robotic solutions to this problem much of the work in this book is related to assembly in space and especially in orbit assembly of large truss structures many of these so called truss structures will be assembled in orbit it is expected that robot manipulators will be used exclusively or at least provide partial assistance to humans intelligent robotic systems for space exploration provides detailed algorithms and analysis for assembly of truss structure in space it reports on actual implementations to date done at nasa s langley research center the johnson space center and the jet propulsion laboratory other implementations and research done at rensselaer are also reported analysis of robot control problems that are unique to a zero gravity environment are presented

Apollo-Soyuz Test Project: Earth observations and photography

1977

smart geotechnics for smart societies contains the contributions presented at the 17th asian regional conference on soil mechanics and geotechnical engineering 17th arc astana kazakhstan 14 18 august 2023 the topics covered include geomaterials for soil improvement tunneling and rock engineering slope embankments and dams shallow and deep foundations soil dynamics and geotechnical earthquake

engineering geoenvironmental engineering and frost geotechnics investigation of foundations of historical structures and monitoring offshore harbor geotechnics and geoenvironmental megaprojects and transportation geotechnics smart geotechnics for smart societies will be of interest to academics and engineers interested or involved in geotechnical engineering

1995 Shuttle Small Payloads Symposium

1995

as the astronauts home base and the site of mission control the johnson space center has witnessed some of the most triumphant moments in american history spanning initiatives from the 1960s to 1993 this illustrated volume traces the center s history starting with its origins at the beginning of the space race in the late 1950s thrilling authoritative accounts explain the development and achievements of the early space voyages the lunar landing the mercury gemini and apollo programs and the space shuttles and international space station as astronaut donald k slayton notes in his foreword this chronicle emphasizes the cooperation of humans on space and on the ground it realistically balances the role of the highly visible astronaut with the mammoth supporting team an official nasa publication suddenly tomorrow came is profusely illustrated with forty four figures and tables plus sixty three photographs historian paul dickson brings the narrative up to date with an informative new introduction

The 1995 Shuttle Small Payloads Symposium

1995

grounded in the grandeur of the sub saharan wilderness the story of bones traces a remarkable boy s journey from a hardscrabble cassava farm to the rarified world of a private african safari camp bones comes of age facing heartache deprivation and formidable human adversaries the most dangerous creatures in africa his path to love and fulfillment awakens a passion for imperiled animals while forging loyalties that force him to make a wrenching decision the narrative pulses with tension and unforeseen twists provocative and moving the story of bones builds to a powerful appeal for the preservation of africa s most endangered species an author at the peak of her storytelling powers donna cousins transports readers to the sights sounds smells and realities both harsh and beautiful of the african bush foreword indies 2018 book of the year finalist in two categories general adult fiction and multicultural adult fiction
