this book addresses a simple question how do russians understand international law is it the same understanding as in the west or is it in some ways different and if so why it answers these questions by drawing on from three different yet closely interconnected perspectives history theory and recent state practice the work uses comparative international law as starting point and argues that in order to understand post soviet russia s state and scholarly approaches to international law one should take into account the history of ideas in russia to an extent russian understandings of international law differ from what is considered the mainstream in the west one specific feature of this book is that it goes inside the language of international law as

this is the first book that explores whether there are any rules in international law applicable to unilateral sanctions and if so what they are the book examines both the lawfulness of unilateral sanctions and the limitations within which they should operate in doing so it includes an analysis of state practice the provisions of various international legal instruments dealing with such sanctions and their impact on other areas of international law such as freedom of navigation aviation and transit and the principles of international trade investment regional economic integration and the protection of human rights and the environment this study finds that unilateral sanctions by a state or a group of states against another state as opposed to smart or targeted sanctions of limited scope would be unlawful unless they meet the procedural and substantive requirements stipulated in international law importantly the book identifies and consolidates these requirements scattered in different areas of international law including the additional rules of customary international law that have emerged out of the recent practice of states and that increase the limitations on the use of unilateral sanctions

armed non state actors ansas often have economic aims that international law needs to respond to this book looks at the aim of islamic state to create an effective government with an economically independent regime which focused on key oilfields in syria and iraq having addressed islamic state s quest for energy resources in iraq and syria the book explores the lawfulness of the war with islamic state from a variety of legal aspects it has been attempted to make inroads into the most controversial aspects of contradictions in the application of jus ad bellum and jus in bello particularly when discussing the use of extraterritorial armed force against ansas and the obligation to protect civilian objects including the natural environment the

~~question is whether the targeting of energy resources should~~
be regarded as a violation of the laws of armed conflict even though the war with islamic state being classified as a non international armed conflict ambitious in scope the study argues that legal theory and state practice are still problematic as to how and under what conditions states can justify resorting to military force in foreign territory and to what extent they can target natural resources as being part of state property furthermore it goes on to examine the differences between international and non international armed conflicts to establish whether there is any difference in the targeting of energy resources as part of the war sustaining capabilities of either party through an examination of the islamic state case the book offers a comprehensive study to close the gaps in jus in bello by contextualising the questions of civilian protection victimisation and state responsibility by evaluating the us s war sustaining theory as a justification for the destruction of a territorial state s natural resources that are occupied by ansas
