narrative of this informational text while additional search tools including a glossary and an index help students locate and review important information age from 4 years old this bedtime story about wild animals and marine life is perfect for young children and early readers through this short story children will go on a marvelous adventure while discovering the wonders of life beneath the sea tara an adorable sea turtle feels ready to leave home and face the biggest adventure of her life going back to the beach where she was born like all sea turtles around the world she has a long journey ahead and will have to face many dangerous situations fortunately she is not alone she is surrounded by the most cheerful friends ever some little fish a dolphin and a sea horse thanks to the amazing journey series and the adventures of max zaki tara and cindy four baby animals children will learn about animal migration while enjoying gorgeous illustrations featured books zaki the zebra max the penguin cindy the stork about caramel publishing since 1993 caramel publishing has specialized in the creation of children s books every year they create unforgettable stories that are read by millions of children worldwide today their books are more available than ever thanks to the digital era excerpt it s a wonderful day at the bottom of the sea what is that noise tara the sea turtle takes a peek from behind a rock she has a sleepy face wake up the old crab waves his pincers to hurry her up you have to get ready for the long journey streamlined and equipped with flippers sea turtles seem uniquely adapted for water yet remain firmly attached to land where the females lay their eggs each year they sport the many colors of the rainbow range in weight from 100 to 1 300 pounds and figure in the mythology and folklore of cultures around the world and still they currently risk extinction in this book marine biologist blair ernest witherington who has devoted decades to these ancient creatures offers readers an in depth look into their mysterious world accompanied by exquisite photographs his descriptions comprise a personal introduction to these strangely graceful marine reptiles detailed lively and up to date imagery tells the story of sea turtles distant origins their specialized form and undersea challenges senses and life cycle world voyages and navigational talents and their ecological roles the most comprehensive overview of sea turtles to date this book portrays each of the seven species in close up offering information on appearance distribution movements life history reproduction diet unique traits and conservation based on a true story this enchanted book tells the tale of a young sea turtle named eartha who finds help in the last place she expects back cover join teddy t tortoise the famed tortoise who raced the hare on another adventure as he vacations at the beach and meets a group of sea turtles but one of his new buddies finds it hard to accept teddy because he s different however teddy is gentle kind and accepts everyone as they are can he convince his new sea turtle friend that it s okay to be different and that we should celebrate and accept those differences the tortoise meets the sea turtles teaches young children that even if someone is different from us that doesn t mean we can t be friends in spite of those differences pandora the sea turtle carries on from chaos the kitten who stole the moon this is an old story being retold it is about a helpful sea turtle that helped to form the first dry land and why sea turtles today return to land every year describes the life cycle and characteristics of leatherback sea turtles including physical and environmental threats to the species time for school the sea keepers attend a very special underwater school in this magical new series about saving our oceans it s time for baby sea turtles to be born but the beach is covered in rubbish the sea keepers need to clean up the sand before the eggs hatch but not everyone wants to help the baby sea turtles evil siren effluvia has enchanted a shoal of vicious barracuda who want to gobble them up can emily grace and layla find a magic pearl to keep the hatchlings safe or will effluvia beat them to it sea turtles field research and conservation is a comprehensive reference of experiences with sea turtle species from global experts this book looks at the human side of protecting and studying these unique animals around the world as well as the challenges involved such as cultural differences and conducting research in remote locations led by a renowned expert in sea turtle conservation this book addresses the largest issue facing sea turtle species currently nearly all species of sea turtles are endangered due to poaching fishing snares climate change and more chapters in this book range from the use of cutting edge technology to learn more about this elusive reptile to working with communities with long histories of sea turtle trade and consumption it provides readers with firsthand accounts of sea turtle conservation efforts from conservationists based around the world and offers important suggestions and solutions for ensuring the future of these sea turtle species sea turtles field research and conservation is the ideal resource for field biologist and marine conservationists specifically those working in marine herpetology and with sea turtle species policymakers concerned with marine conservation wildlife protection and sustainable development will also find this a useful reference for efforts and directions to enact change and save sea turtles from extinction offers examples of groundbreaking technology to conduct noninvasive sea turtle research written by global experts working in the field to study and protect sea turtle species includes human to human case studies and advice for collaborating with cultures and communities to save these endangered animals seaturtle discovery kids sea stories of cute sea turtles with funny pictures photos memes of seaturtles for children does your child love cute sea turtles if the answer is yes this sea turtle discovery picture book for children that is part of kate cruso s discovery book series is what your child you as a parent are both going to love inside the sea turtle discovery book your child will learn about things like what is the history behind the origin of sea turtles what are the various species how do sea turtles reproduce how do sea turtle babies look like are sea turtles carnivore herbivore or omnivore what do the sea turtles eat are sea turtles social some revelations truths other curious stuff about sea turtles can sea turtles be kept as pet important sea turtle resources more this book will take your child through a journey of fun facts amazing discoveries curious and intriguing stories about sea turtles and hilarious pictures about sea turtles you will find some interesting revelations secrets you probably never heard about sea turtles some myths and truths and other curious stuff about sea turtles that children just find cool and groovy to know are also included for example did you know that a sea turtle prefers bright and shiny colors like a

bright sunny yellow kids learn about new and interesting facts so that a combination of both the curious and the new materials and facts together with the visual aspect of the pictures children are entertained with the coolness factor of the discovery book plus they learn some new and a little bit harder to retain facts simultaneously with the cool stuff and this is how the child is going to retain all of the information the discovery books work in synchronization with the brain and not against the brain like some dull textbooks try to teach things it is a fact that kids just love these discovery picture books about weird animals and weird stuff that the animals are doing because they love the coolness and grooviness factor of the books parents are super satisfied because their children show interest for things on a higher level of interest as usual the discovery concept of this sea turtle book for example transforms a little bit more dry information and facts into brain friendly information that the child will retain that the child will be able to use as active information later on getting a child involved in the learning and discovery process is key once your child gets started with raising all kinds of questions you actually have done a great job as a parent because the active and creative process of raising questions independently is where intelligence starts to develop and grow into a totally new dimension if your child asks lots of questions you actually have the proof that providing discovery books to your child actually works because children who discover with their own senses and in an active and interactive way are able to develop intelligence on a much higher level than children who are not asking any questions and who are passively sitting in front of a tv all day long stimulation of thought and contemplation increases intelligence and the brain power and tv kills the brain cells of your child parents and home schoolers alike are reporting unprecedented results from using this books as learning materials they get results even with children who usually hate reading books and who have problems learning and retaining new and dry information this compelling addition to the award winning scientists in the field series explores the leatherback sea turtle s remarkable natural history and recounts the extraordinary efforts by scientists trying to save them sea turtles face a number of obstacles on their travels through the ocean in this engaging book readers will follow grace a charming green sea turtle on an important journey through the water highlighting a significant part of the life cycle this book also touches on environmental issues facing our waters colorful photographs and an exciting narrative will appeal to readers and animal lovers of many ages as an invaluable resource to complement elementary life science curricula this book will make a wonderful addition to any library or classroom from the magical moment of her hatching follow salty the sea turtle as she begins her journey this lyrical tale captures what salty discovers as she grows from a tiny baby turtle to an adult the life cycle repeats itself when salty returns to that very same beach where she was born inspiration for salty the sea turtle emerged from the author and illustrator s personal experience throughout the summer and into the early fall sea turtles hatch from nests that dot the coastal beaches of southwest florida each day a park ranger searches for newly hatched clutches and documents the number of hatched eggs one summer morning while accompanying the ranger randi and claire watched as a nest was being excavated two tiny sea turtles struggled to free themselves the marvel of new life so fragile and so rarely seen was captured on that morning at barefoot beach it was an unforgettable experience to hold the hatchlings and set them down in the sand as they bravely made their way to the gulf claire lawrence works as a life skills and academic coach for children with social and behavioral challenges combining her love of animals with her skill as a writer claire has published delightful and whimsical nature stories she lives in bonita springs florida with her husband tom and two english labs randi zwicker has taught reading and language arts at both the elementary and middle school levels through her years of experience she has realized the profound impact that illustrations have when a young child is choosing a book to read she has been drawing and painting since childhood and works with a variety of media she lives in bonita springs florida with her husband bill her two persian cats and her cockatiel snow story of norman the sea turtle and a look at his life under the sea and the many sea creatures he interacts with the bright playful illustrations add a whimsical touch to this fun story for little listeners learning about marine life here plotkin and her colleagues reveal the nature of these species and the steps needed to make sure they remain a permanent part of the marine environment there is a deserted bay on a small island off antigua where hawksbill turtles crawl ashore at night during the mating season to lay their eggs two months later the hatchlings each weighing less than an ounce emerge from the sand and scramble to the sea in the moonlight only a lucky few survive mary beth owens was inspired by her admiration and concern for these critically endangered animals to write and illustrate this beautiful book the narrator a craggy ancient jumbo tree that stands sentinel over the bay observes a hawksbill s arrival by night her arduous trek to excavate a nest and bury her eggs her solitary return to the sea and the later diaspora of her hatchlings spare prose complements pages saturated with caribbean color or brooding in ghostly moonlight dash tried so very hard to keep up with the rest but something was different he couldn t get out of the nest see what happens when little dash learns that being different isn t always bad sometimes it can make you the fastest sea turtle in the bunch children and adults will love how dash the turtle reminds them that we must all learn to use our differences not fear them this 3 in 1 box set compilation includes kate cruise s timmie guzzmann s intriguing interesting panda sea turtle fact book for kids and beautiful horse book plus the lol dr seuss style dog jerk rhyming poem book with hilarious rhyming verses for kids the compilation includes book 1 panda discovery book book 2 sea turtle discovery book book 3 cat jerks book book 1 inside the sea turtles discovery book your child will learn about things like what is the history behind the origin of sea turtles what are the various species how do sea turtles reproduce how do sea turtle babies look like are sea turtles carnivore herbivore or omnivore what do the sea turtles eat are sea turtles social some revelations truths other curious stuff about sea turtles can sea turtles be kept as pet important sea turtle resources book 2 inside you ll find interesting intriguing funny weird panda moments like a history of lovable panda bears where do pandas hide and where do we find them sniff sniff

and other panda senses how do pandas communicate panda moves panda defense panda baby boom how do pandas spend their day up for some panda playtime pandas bamboos pandas us humans interesting curious intriguing facts about pandas and lots more book 3 inside you ll find jerky dog moments like jerky treats better than celery sticks the perky bullfrog trick pee wee herman philosophy soggy doggy the flirt schooled lord of misrule and lots more get this 3 in 1 box set compilation today because buying the 3 in 1 box set compilation gives you more value for a smaller prize but you can also buy each book individually if your kid loves frogs toads snakes and hilariously funny cats this box set compilation will give you an awesome value and makes your child smiling longer publisher description
