Manoeuvring Technical Manual 1993 over 1 600 total pages 14097 fire controlman supervisor covers fire controlman supervisor responsibilities organization administration inspections and maintenance supervision and training combat systems subsystems and their maintenance and weapons exercises 14098 fire controlman volume 01 administration and safety covers general administration technical administration electronics safety and hazardous materials as they pertain to the fc rating 14099a fire controlman volume 02 fire control systems and radar fundamentals covers basic radar systems fire control systems and radar safety as they relate to the fire controlman rating 14100 fire controlman volume 03 digital data systems covers computer and peripheral fundamentals and operations configurations and hardware operator controls and controlling units components and circuits central processing units and buses memories input output and interfacing instructions and man machine interfaces magnetic tape storage magnetic disk storage cd rom storage printers data conversion devices and switchboards 14101 fire controlman volume 04 fire control maintenance concepts introduces the planned maintenance system and discusses methods for identifying and isolating system faults liquid cooling systems used by fire controlmen battery alignment purpose equipment and alignment considerations and radar collimation 14102 fire controlman volume 05 display systems and devices covers basic display devices and input devices associated with navy tactical data systems as used by the fc rating 14103 fire controlman volume 06

digital communications covers the fundamentals of data communications the link 11 and link 4a systems and local area networks 14104a fireman provides information on the following subject areas engineering administration engineering fundamentals the basic steam cycle gas turbines internal combustion engines ship propulsion pumps valves and piping auxiliary machinery and equipment instruments shipboard electrical equipment and environmental controls

Enlisted Qualifications Manual 1990 u s navy diving manual the us navy first provided a diving manual for training and operational guidance in 1905 and the first book titled diving manual was published in 1916 since then the u s navy diving manual evolved over the decades to be regarded as an essential and ultimate resource for modern recreational commercial and military divers there have been several published versions each one updating the content of the previous version revision 7 change a is the latest version released in april 2018 and includes major updates and changes this extensive technical manual is over 1000 pages and spread over 5 volumes with 18 chapters this is essential reading for anyone serious about diving contents u s navy diving manual volume 1 diving principles and policy chapter 1 history of diving chapter 2 underwater physics chapter 3 underwater physiology and diving disorders chapter 4 dive systems chapter 5 dive program administration appendix 1a safe diving distances from transmitting sonar appendix 1b references appendix 1c telephone numbers appendix 1d list of acronyms volume 2 air diving

operations chapter 6 operational planning and risk management chapter 7 scuba air diving operations chapter 8 surface supplied air diving operations chapter 9 air decompression chapter 10 nitrogen oxygen diving operations chapter 11 ice and cold water diving operations appendix 2a optional shallow water diving tables appendix 2b u s navy dive computer appendix 2c environmental and operational hazards appendix 2d guidance for u s navy diving on a dynamic positioning vessel volume 3 mixed gas surface supplied diving operations chapter 12 surface supplied mixed gas diving procedures chapter 13 saturation diving chapter 14 breathing gas mixing procedures volume 4 closed circuit and semiclosed circuit diving operations chapter 15 electronically controlled closed circuit underwater breathing apparatus ec uba diving chapter 16 closed circuit oxygen uba diving volume 5 diving medicine and recompression chamber operations chapter 17 diagnosis and treatment of decompression sickness and arterial gas embolism chapter 18 recompression chamber operation appendix 5a neurological examination appendix 5b first aid appendix 5c dangerous marine animals

Shipfitter 1 & C. 1965 this manual is intended primarily for use by foundry personnel aboard repair ships and tenders the recommended practices are based on procedures proved workable under navy conditions and are supplemented by information from industrial sources the manual is divided into two general sections the first section chapters 1 through 13 contains information of a

general nature such as how metals solidify designing a casting sands for molds and cores gates risers and chills and description and operation of melting furnaces subjects covered in these chapters are generally applicable to all of the metals that may be cast aboard ship the second section chapters 14 through 21 contains information on specific types of alloys such as copper base alloys aluminum base alloys cast iron and steel specific melting practices suggestions for sand mixes molding practices gating and risering are covered in these chapters this manual has been written with the how to do it idea as the principal aim discussions as to the why of certain procedures have been kept to a minimum this manual contains information that should result in the production of consistently better castings by repair ship personnel

Technical Manual for Bathythermographs OC-1/S, OC-2/S, OC-3/S, OC-1A/S, OC-2S/S, OC-3A/S, OC-1B/S, OC-2B/S, OC-3B/S, OC-1C/S, OC-2C/S, OC-3C/S. 1960 over 1 000 total pages introduction 1 1 1 purpose this chapter provides a general history of the development of military diving operations 1 1 2 scope this chapter outlines the hard work and dedication of a number of individuals who were pioneers in the development of diving technology as with any endeavor it is important to build on the discoveries of our predecessors and not repeat mistakes of the past 1 1 3 role of the u s navy the u s navy is a leader in the development of modern diving and underwater operations the general requirements of national defense and the specific requirements

of underwater reconnaissance demolition ordnance disposal construction ship maintenance search rescue and salvage operations repeatedly give impetus to training and development navy diving is no longer limited to tactical combat operations wartime salvage and submarine sinkings fleet diving has become increasingly important and diversified since world war ii a major part of the diving mission is inspecting and repairing naval vessels to minimize downtime and the need for dry docking other aspects of fleet diving include recovering practice and research torpedoes installing and repairing underwater electronic arrays underwater construction and locating and recovering downed aircraft

Tables of Technical Data 1948 this technical manual provides a comprehensive guide to the construction and design of ships beginning with the basic principles of naval architecture and proceeding to more advanced topics such as hull design propulsion systems and ship stability it is intended for both students and professionals in the field of shipbuilding and marine engineering this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it this work is in the public domain in the united states of america and possibly other nations within the united states you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work scholars believe and we concur that this work is important enough to be preserved reproduced and made generally

available to the public we appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant
