encounter with god seven years ago 2011 that changed my perspective the lord asked me a question that shook me out of ignorance he said if jesus was physically here in nigeria what do you think he will do about the economy of the nation he went further to remind how he had made me gained admission into business schools even though they were on scholarship to learn about entrepreneurship and later export trade he told me plainly that he wanted to equip me with certain knowledge so that i will be able to teach others he then said i should begin to run trainings seminars on export trade so as to raise exporters across the nation i was made to understand that we consume mostly imported things and refuse to export our own goods and services rise up and raise exporters so that the nation economy becomes better that was the assignment i got from god i wrote this book in order to further answer the call of raising exporters that will change the nation s economy improve and contribute to gdp this volume undertakes the important task of envisioning a regional history of asia based on its unique internal characteristics going beyond the usual west non west dichotomy the regional trade zone of modern asia was debated in the 1980s since then japanese historians of the socioeconomic history of asia have explored how the traditional trade relations that had developed over the centuries in asia responded to the so called western impacts in the mid nineteenth century including the opening of ports and tariff reduction under free trade regimes and the advance in transportation technology against this academic background the four chapters in this volume examine how overseas chinese some of the key actors in regional and local trade dealt with their western counterparts and how asian commodities penetrated other parts of the world through the newly created web of global commerce the book reviews discuss theoretical issues to explore various connections among and comparisons of the economies in the region this volume provides readers with critical insights into the asian region in the past and present by investigating the long term trajectory of its linkages to the global economy the fundamentals of international trade and the balance of payments are well known unfortunately they are often sadly neglected by policy makers and not well understood by journalists who opine on such matters as a result politicians advocate a variety of tax and trade measures that sound desirable but not only cannot be achieved but actually hurt the economy this book is designed to lay out the fundamentals that must be present for policy to work as intended the material in this book was tested over an 11 year period on more than 150 students most of whom entered the course with a minimum of training in economics their difficulties were noted and the material refined to overcome them this book is intended for those who have a serious interest in policy dealing with international trade and finance while the subject matter has not been made simple an impossibility it has been made clear internationalization of the world economy has made trade a key factor in the growth potential of nearly every economy hence economists have become increasingly interested in the determinants of international trade and competitiveness empirical models i this fascinating book is loaded with practical information designed to help you in the commodity market the author's method proven by his million dollar success does not involve complicated math or subjective evaluation there are two completely systematic methods r and momentum the essence fo these methods is that they tell you if the super powers are long or short when the super powers expect a major move to start what commodities are in true bull or bear markets when to start buying and when to sell for gargantuan profits this book is a must if you re a stock or commodity trader it will expose to you
