this book illustrates the link that unites memory thought and narration and explores how the act of telling helps people to understand

themselves and others the structure of the book is divided into two parts the first part focuses on the aspect of narrative comprehension the person as narrator it identifies two different origins of narrative comprehension memory and play and argues that the narratives we produce starting from autobiographical memory are intended to give order and meaning to events that happened in the past in order to be able to interpret the present conversely the narratives we produce starting from play are aesthetically constructed not forced to respect reality and because of this create potential new worlds of understanding the second part of this book is devoted to the study of narrative understanding as an understanding of the other chapters examine the different points of view a listener can adopt in order to interpret the text produced by a narrator and how these points of view can interact with each other the book concludes with a consideration of narrative comprehension in the digital world and examines the principal effects of stories and narrative on the notion of self in the realm of the internet galaxy telling to understand will be of interest to researchers and students in cognitive science psychology literary studies philosophy education and educational technology as well as any reader interested in enlarging their concept of narrative and how narrating modifies the self
