A HUMAN VENTURE 2009-10-30 raya dunayevskaya is hailed as the founder of marxist humanism in the united states in this new collection of her essays co editors peter hudis and kevin b anderson have crafted a work in which the true power and originality of dunayevskaya s ideas are displayed this extensive collection of writings on hegel marx and dialectics captures dunayevskaya s central dictum that contrary to the established views of hegelians and marxists hegel was of signal importance to the theory and practice of marxism the power of negativity sheds light not only on marxist humanism and

the rooting of dunayevskaya's marxist humanist theories in hegel but also on the life of one of america's most penetrating and provocative critical thinkers

A Series of Pamphlets on the Doctrines of the Gospel 1891 philosophy as a way of life this unique collection of essays on the late pierre hadot's revolutionary methodological approach to studying and practicing philosophy explores hadot's primary conviction that philosophy itself goes beyond solving puzzles and analyzing abstract arguments hadot believed that philosophy is a key part of humanity's search for happiness that it can transform our perception of the world and thus can alter our very mode of being his argument that the goal of philosophy is to shift our focus away from our habitual obsession with individuality and to embrace universality and objectivity has resonated with thinkers across the academy and outside it offering genuinely interdisciplinary analysis of hadot's work and philosophical practice this volume includes papers written from a gamut of philosophical historical and geographical perspectives articles address issues in the history of philosophy from pythagoras to descartes by way of islamic thought thus corresponding to hadot's view of the importance of philologically based analysis of ancient texts and historical contexts others study the presence of ideas related to or influenced by hadot in contemporary thought from wittgenstein to leonard nelson analytic philosophy and french postmodernism the result is a wide ranging publication pointing to an additional third way alongside the traditional approaches of continental and analytic philosophy one that expands our horizons with secular spiritual exercises designed to enable us to be in a fuller more authentic way

Permanently Beat Hypothyroidism Naturally 2012-03-21 this text examines a series of pervasive themes of human existence and the challenges of being and relating areas investigated include the nature and meaning of being different possessiveness and being possessed and dimensions of loneliness mystery and self disclosure

Ballistic Trauma 2005-12-27 wildlife forensics is the application of forensic science to the conservation and protection of non domesticated animals both in the wild and in captivity providing an in depth introduction to this rapidly evolving field wildlife forensic investigation principles and practice also chronicles aspects of the history of management conservation and environmental protection with an emphasis on their global importance in the twenty first century the book examines the crucial role of wildlife forensic investigation with regard to live animals dead animals and samples and covers national regional and international legislation while the text particularly focuses on forensic science as it relates to wild animals it also includes mention of plants and habitats because of their relevance to conservation the book discusses animal welfare as well as the damage that can be inflicted on humans and property by wildlife offering access to sound evidence based on good science and obtained using the best available practices the book is enhanced by case studies from experts who describe some of their own work this resource is essential for those involved in a range of endeavours including investigating wildlife crime identifying animal remains ascertaining the circumstances of death of wild species and other legal proceedings and activities concerning wildlife the forensic skills described in this book can be applied to a wide range of activities not necessarily involving the legal process including environmental impact assessments insurance claims governmental and other enquiries checking of trading standards and the inspection of for instance pet shops animal boarding establishments and zoological collections the authors point out that one of the most important requirements of those persons involved in wildlife forensic work is to retain an open mind such personnel should also be conscious of new developments and evolving techniques and be able to anticipate situations where their investigative and scientific skills might be used to advantage so called horizon scanning examples of these are given
