Book 2: True Bigfoot Horror: the Apex Predator - Monster in the Woods 2016-07-03 it was a frigid cold night on the icy and rugged slopes of the ural mountains when nine experienced hikers died their case is one which is shrouded in mystery it is known as the dyatlov pass incident the events that conspired the evening of february 2 1959 will forever be unknown but what we do know for sure is that the hikers cut their way out of the safety and warmth of their tents in the middle of the night they ran down to the snow and ice covered woods wearing nothing more than their undergarments they were never seen alive again when the hikers failed to return from their trip search parties were sent out they found the hikers spread throughout the forest nearly naked barefoot and dead four of the nine hikers had internal injuries and one of them ludmila dubinina had significant damage to her eye as well as her tongue ripped out on a piece of newspaper left behind in the tent the hikers had scribbled these words from now on we know that the snowmen exist why would nine experienced hikers leave in such haste that they cut their way out of their tent what were they running from what threat is so terrifying that it could lead a rational person to run into an ice and snow covered terrain without shoes wearing nothing but undergarments they had clothes in their tents specifically designed to keep them warm and safe from hypothermia in those exact environmental conditions what scared them so much skeptics would have you believe the culprit is anything but the yeti how could they otherwise they have excluded the possibility because they refuse to lend any credibility to its existence which is fair enough however i have seen the yeti s cousin in washington state and it was not a pleasant encounter i know that the cryptid megafauna primate bigfoot exists he is as real as you and i and he is dangerous what happened that evening will always be disputed but there is no doubt that their story is not unique people have been mysteriously disappearing in the wilderness for over a century and most likely long before that in part i am sure it is due to violent bigfoot encounters

True Bigfoot Horror: the Apex Predator - Monster in the Woods 2016-05-11 the oldest recorded account of bigfoot dates all the way back to 986 ad by famous viking explorer leif ericson and his men upon their first landing in the new world the norsemen wrote about manlike beasts that towered over the vikings these beasts were distinctly different than the natives they encountered they wrote that these beasts were horribly ugly hairy swarthy and with great black eyes the vikings called these ape like bipedal beasts skellring the skellring lived in the woods had a foul smelling odor and a deafening shriek leif had many encounters with the skellring before departing from the island bryan sykes a professor of human genetics at oxford university who recently embarked on a project to dna test any or all available evidence for the existence of bigfoot said belief in bigfoot like beasts is a very consistent feature across cultures so much so that i have found indigenous people not even bothering to question their existence as they are so much a part of everyday life the following book is the accumulation of years of research following my encounter at the time i was looking for others who had experiences similar to mine it was the only form of therapy i could find that eased my anxiety i refused to go to the town s only therapist in a small town like this everyone would have known and it would have served as cause for a black mark on my family after years of researching bigfoot the yeti and sasquatch i have collected hundreds of accounts some i believe to be true and some i believe to be false claims of people looking for their names in print or their face on a tv screen this book is the accounts i believe are most certainly true

Bigfoot 2009-08-01 last august two men in rural georgia announced that they had killed bigfoot the claim drew instant feverish

attention leading to more than 1 000 news stories worldwide despite the fact that nearly everyone knew it was a hoax though bigfoot may not exist there's no denying bigfoot mania with bigfoot joshua blu buhs traces the wild and woolly story of america's favorite homegrown monster he begins with nineteenth century accounts of wildmen roaming the forests of america treks to the himalayas to reckon with the abominable snowman then takes us to northern california in 1958 when reports of a hairy hominid loping through remote woodlands marked bigfoot's emergence as a modern marvel buhs delves deeply into the trove of lore and misinformation that has sprung up around bigfoot in the ensuing half century we meet charlatans pseudo scientists and dedicated hunters of the beast and with buhs as our guide the focus is always less on evaluating their claims than on understanding why bigfoot has inspired all this drama and devotion in the first place what does our fascination with this monster say about our modern relationship to wilderness individuality class consumerism and the media writing with a scientist's skepticism but an enthusiast's deep engagement buhs invests the story of bigfoot with the detail and power of a novel offering the definitive take on this elusive beast

Bigfoot and the Loch Ness Monster 2023-12-28 people have always been fascinated with the hidden the mysterious and the unexplained every society has its tall tales and ghost stories its odd legends and heroes also every society has its stories of strange beasts dangerous or benign that live in the twilight world between the everyday and the legendary through most of history people have been closely tied to nature hunting in forests and having an intimate knowledge of the animals in their regions so called primitive peoples were walking encyclopedias of the natural world and yet most believed there were more creatures lurking in those woods than the ones they usually encountered even as the world becomes more connected the belief in strange creatures continues as strong as ever although cryptozoology is often scoffed at and widely considered a pseudoscience one of the reasons it made men like p t barnum rich and continues to fascinate people today is the fact that people realize they've only scratched the surface when it comes to identifying all the different forms of life on earth as martin delrio pointed out in the loch ness monster animals previously unknown to science have been found more than once in the past hundred years for instance there's the megamouth shark megachasma pelagios a fifteen foot long creature weighing nearly a ton the first specimen was discovered on november 15 1976 when it was found entangled in the drag anchor of a u s navy ship the new creature wasn't described scientifically until 1983 the megamouth remains the only species in its genus and the only genus in its order in north america the most debated subject in cryptozoology concerns the existence or otherwise of a large unknown hominid inhabiting the pacific northwest of the united states and canada's west coast for many skeptics this is nothing more than a woodland fairy tale that illustrates the credulity of believers because they believe it would be impossible for such a creature to exist in a country as heavily populated as the united states yet remain completely unknown to mainstream zoologists on the face of it that seems a fair contention since other large creatures such as bears mountain lions elk and many others live in the region biologists have been able to study these animals in the wild to recover remains of dead animals and even live specimens but while a great many people have looked to date no one has been able to capture a bigfoot or to find remains or other physical evidence such as hair that can be definitively shown to have come from an unknown hominid that certainly seems to support the skeptics case while cryptids like bigfoot and the yeti have become popular in recent decades none of them can touch the notoriety of the loch ness monster a large unknown creature allegedly living in a loch in the highlands of scotland was it a relic dinosaur or perhaps an entirely new species new photographs and new eyewitness sightings fueled a growing debate and transformed the loch ness monster also known as nessie into an instantly recognizable staple of pop culture to the extent that hundreds of thousands of visitors came to loch ness every year in hopes of catching a glimpse of the loch's famous inhabitant the loch ness monster remains an international brand and the best known cryptid in the world but after almost 100 years of fame and media attention

what do people really know about this cryptid and is there any proof that there really is something large and unknown living in a remote scottish loch
