a comprehensive history of censorship in modern britain for victorian lawmakers and judges the question of whether a book should be allowed to circulate freely depended on whether it was sold to readers whose mental and moral capacities were in doubt by which they meant the increasingly literate and enfranchised working classes the law stayed this way even as society evolved in 1960 in the obscenity trial over d h lawrence s lady chatterley s lover the prosecutor asked the jury is it a book that you would even wish your wife or your servants to read christopher hilliard traces the history of british censorship from the victorians to margaret thatcher exposing the tensions between obscenity law and a changing british society hilliard goes behind the scenes of major obscenity trials and uncovers the routines of everyday censorship shedding new light on the british reception of literary modernism and popular entertainments such as the cinema and american style pulp fiction and comic books he

reveals the thinking of lawyers and the police authors and publishers and politicians and ordinary citizens as they wrestled with questions of freedom and morality he describes how supporters and opponents of censorship alike tried to remake the law as they reckoned with changes in sexuality and culture that began in the 1960s based on extensive archival research this incisive and multifaceted book reveals how the issue of censorship challenged british society to confront issues ranging from mass literacy and democratization to feminism gay rights and multiculturalism

do men use bad language more than women how do social class and the use of bad language interact do young speakers use bad language more frequently than older speakers using the spoken section of the british national corpus swearing in english explores questions such as these and considers at length the historical origins of modern attitudes to bad language drawing on a variety of methodologies including historical research and corpus linguistics and a range of data such as

corpora dramatic texts early modern newsbooks and television tony mcenery takes a socio historical approach to discourses about bad language in english arguing that purity of speech and power have come to be connected via a series of moral panics about bad language the book contends that these moral panics over time have generated the differences observable in bad language usage in present day english a fascinating comprehensive insight into an increasingly popular area this book provides an explanation and not simply a description of how modern attitudes to bad language have come about

while liberal democratic states like america britain and australia claim to value freedom of expression and the right to dissent they have always actually criminalized dissent this disposition has worsened since 9 11 and the 2008 great recession this ground breaking study shows that just as dissent involves far more than protest marches so too liberal democratic states have expanded the criminalization of dissent drawing on political and social theorists like arendt bourdieu and isin the book offers a new way of thinking about politics dissent and its criminalization relationally using case studies like the occupy movement selective refusal by israeli soldiers urban squatters democratic education and violence by anti apartheid activists the book highlights the many forms dissent takes along with the many ways liberal democratic states criminalize it the book highlights the mix of fear and delusion in play when states privilege security to protect an imagined political order from difference and disagreement the book makes a major contribution to political theory legal studies and sociology linking legal political and normative studies in new ways watts shows that ultimately liberal democracies rely more on sovereignty and the capacity for coercion and declarations of legal states of exception than on

liberal democratic principles in a time marked by a deepening crisis of democracy the book argues dissent is increasingly valuable

drawing on elements of progressive education existential theory feminist pedagogy and values education critical humanism combines the holistic psychological concerns of humanistic education with the sociopolitical contextualization of critical pedagogy developed over the past seventeen years in one of north america s most experimental postsecondary programs the new school of dawson college this theory and practice responds to both the personal and the political needs of students reconstructing education is at once a review of this century s educational theories an account of the work at the school and an empowering illustration of the way in which schools can incite the motivation of students and encourage them to become active members in a truly democratic society the case study chapters on the new school give concrete examples of how this philosophy is manifested in the school s methodology structure and pedagogy and draws heavily on the written work of teachers and students to formulate a similar approach for a specific school it is essential to combine a rigorous analysis of existing educational models with the dialectical process of creating and recreating a new model defined by the articulation

of both learners and teachers affective cognitive and socially constructed needs this is a valuable book for anyone concerned with alternative approaches to education and for courses on educational theory or the philosophy of education

children s rights law is often studied and perceived in isolation from the broader field of human rights law this volume explores the inter relationship between children s rights law and more general human rights law in order to see whether elements from each could successfully inform the other children s rights law has a number of distinctive characteristics such as the emphasis on the best interests of the child the use of general principles and the inclusion of third parties e g parents and other care takers in treaty provisions the first part of this book questions whether these features could be a source of inspiration for general human rights law in part two the reverse question is asked could children s rights law draw inspiration from developments in other branches of human rights law that focus on other specific categories of rights holders such as women persons with disabilities indigenous peoples or older persons finally the interaction between children s rights law and human rights law and the potential for their isolation inspiration or integration may be coloured or determined by the thematic issue under consideration therefore the third part of the book studies the interplay between children s rights

law and human rights law in the context of
specific topics intra family relations lgbtqi
