a tactical manual of how to effectively fight small wars in hostile territory and difficult terrain based on the author's experiences in west africa it was required reading in both the british and the us armies from its publication in 1907 until it was replaced in the 1930s during the war in sierra leone 1991 2002 members of various rebel movements kidnapped thousands of girls and women some of whom came to take an active part in the armed conflict alongside the rebels in a stunning look at the life of women in wartime chris coulter draws on interviews with more than a hundred women to bring us inside the rebel camps in sierra leone when these girls and women returned to their home villages after the cessation of hostilities their families and peers viewed them with skepticism and fear while humanitarian organizations saw them primarily as victims neither view was particularly helpful in helping them resume normal lives after the war offering lessons for policymakers practitioners and activists coulter shows how prevailing notions of gender both in home communities and among ngo workers led for instance to women who had taken part in armed conflict being bypassed in the demilitarization and demobilization processes carried out by the international community in the wake of the war many of these women found it extremely difficult to return to their families and without institutional support some were forced to turn to prostitution to eke out a living coulter weaves several themes through the work including the nature of gender roles in war livelihood options in war and peace and how war and postwar experiences affect social and kinship relations for almost 15 years south africa was involved in a civil war in angola the so called bush war on behalf of the national union for the total independence of angola faction the climax of the conflict portrayed in this history was the battle of cuito cuanavale the largest military engagement on african soil since world war ii this book provides the firsthand personal accounts of the clash leading up to cuito cuanavale for the first time in english as told by the soviet advisers to the angolan army their experiences of the war as well as their views and assessment of their south african enemies and cuban and angolan allies will not only surprise and fascinate readers but will also offer new insights into the war itself vietnam ambush tells the story of a young man answering the call of america to fight a war against the communist vietnamese as a replacement with the 199th light infantry brigade in 1968 69 it tells of his days in training combat recovering from injuries and his return home amidst the antiwar fervor that had engulfed the usa at that time this memoir will give the reader an invaluable insight into one's participation in a war that today most americans prefer to forget about bernie weisz historian vietnam war it is a well written account of the war from the perspective of a soldier in the field it should be read by every young american who thinks war might be glorious david krieger nuclear age peace foundation at age nineteen daniel seidenberg jr received a draft notice thus began his journey through army life infantry combat and nearly fatal wounds that left him totally disabled he was awarded the purple heart combat infantry badge the vietnamese cross of gallantry and two campaign battle stars it is a remarkable twist in history that over a period of 30 years the only full fledged military campaigns waged by the united states have been initiated by a father and son the two presidents bush yet rather than

edward said and paul b armstrong among others also new to this edition is a section of writings on the connections between heart of darkness and the film apocalypse now by louis k greiff margot norris and lynda j dryden a chronology and selected bibliography are also included soldier repatriation from afghanistan has impacted debate about the war this study highlights this impact with particular focus on britain denmark and germany all three countries deployed soldiers soon after the 9 11 attacks yet their role in afghanistan and the casualty rates suffered have been vastly different this book looks at how their casualties influenced the framing of the war by analysing the political discourse about the casualties how the media covered the repatriation and the burials and how the dead were officially recognised and commemorated explaining how bodies count is not done exclusively by focusing on the political leadership and the media in the three countries the response from the men and women in afghanistan to the official framing of the war is given particular weight martinsen contributes to our understanding of european strategic culture by showing how countries respond to the same security challenges international law in the u s legal system provides a wide ranging overview of how international law intersects with the domestic legal system of the united states and points out various unresolved issues and areas of controversy curtis bradley explains the structure of the u s legal system and the various separation of powers and federalism considerations implicated by this structure especially as these considerations relate to the conduct of foreign affairs against this backdrop he covers all of the principal forms of international law treaties executive agreements decisions and orders of international institutions customary international law and jus cogens norms he also explores a number of issues that are implicated by the intersection of u s law and international law such as treaty withdrawal foreign sovereign immunity international human rights litigation war powers extradition and extraterritoriality this book highlights recent decisions and events relating to the topic including various actions taken during the trump administration while also taking into account relevant historical materials including materials relating to the u s constitutional founding written by one of the most cited international law scholars in the united states the book is a resource for lawyers law students legal scholars and judges from around the world the u s detention center at guantánamo bay has long been synonymous with torture secrecy and the abuse of executive power it has come to epitomize lawlessness and has sparked protracted legal battles and political debate for too long however guantánamo has been viewed in isolation and has overshadowed a larger interconnected global detention system that includes other military prisons such as bagram air base in afghanistan secret cia jails and the transfer of prisoners to other countries for torture guantánamo is simply and alarmingly the most visible example of a much larger prison system designed to operate outside the law habeas corpus after 9 11 examines the rise of the u s run global detention system that emerged after 9 11 and the efforts to challenge it through habeas corpus a petition to appear in court to claim unlawful imprisonment habeas expert and litigator jonathan hafetz gives us an insider s view of the detention of enemy combatants and an accessible explanation of the complex forces that keep these systems running in the age of terrorism some argue that habeas corpus is impractical and unwise hafetz advocates that it remains the single most important check against arbitrary and unlawful detention torture and the abuse of executive power the business of war considers the myriad ways in which transnational labour migration intersects with the occupation of iraq and examines the role

of the usa in the middle east the book places the war on terror within the practices of neoliberalism but also links this with migration issues and argues that it is all part of a larger business of conflict
