focusing on late nineteenth and twentieth century stories of detection policing and espionage by british and south asian writers yumna siddiqi presents an original and compelling exploration of the cultural anxieties created by imperialism she suggests that while colonial writers use narratives of intrigue to endorse imperial rule postcolonial writers turn the generic conventions and topography of the fiction of intrigue on its head launching a critique of imperial power that makes the repressive and emancipatory impulses of postcolonial modernity visible siddiqi devotes the first part of her book to the colonial fiction of arthur conan doyle and john buchan in which the british regime s preoccupation with maintaining power found its voice the rationalization of difference pronouncedly expressed through the genre s strategies of representation and narrative resolution helped to reinforce domination and in some cases allay fears concerning the loss of colonial power in the second part siddiqi argues that late twentieth century south asian writers also underscore the state s insecurities but unlike british imperial writers they take a critical view of the state s authoritarian tendencies such writers as amitav ghosh michael ondaatje arundhati roy and salman rushdie use the conventions of detective and spy fiction in creative ways to explore the coercive actions of the postcolonial state and the power dynamics of a postcolonial new empire drawing on the work of leading theorists of imperialism such as edward said frantz fanon and the subaltern studies historians siddiqi reveals how british writers express the anxious workings of a will to maintain imperial power in their writing she also illuminates the ways south asian writers portray the paradoxes of postcolonial modernity and trace the ruses and uses of reason in a world where the modern marks a horizon not only of hope but also of economic military and ecological disaster

heavenly intrigue is the fascinating true account of the seventeenth century collaboration between johannes kepler and tycho brahe that revolutionized our understanding of the universe and ended in murder one of history s greatest geniuses kepler laid the foundations of modern physics with his revolutionary laws of planetary motion but his beautiful mind was beset by demons born into poverty and abuse half blinded by smallpox he festered with rage resentment and a longing for worldly fame brahe his mentor was a flamboyant aristocrat who had spent forty years mapping the heavens with unprecedented accuracy but he refused to share his data with kepler with brahe s untimely death in prague in 1601 rumors flew across europe that he had been murdered but it took twentieth century forensics to uncover the poison in his remains and the detective work of joshua and anne lee gilder to identify the prime suspect the ambitious envy ridden kepler himself a fast paced true life account that reads like a thriller heavenly intrigue is a remarkable feat of historical re creation

how do transitional democracies deal with officials who have been tainted by complicity with prior governments should they be excluded or should they be incorporated into the new system in lustration and transitional justice roman david examines major institutional innovations that developed in central europe following the collapse of communist regimes while the czech republic approved a lustration vetting law based on the traditional method of dismissals hungary and poland devised alternative models that granted their tainted officials a second chance in exchange for truth david classifies personnel systems as exclusive inclusive and reconciliatory they are based on dismissal exposure and confession respectively and they represent three major classes of transitional justice david argues that in addition to their immediate purposes personnel systems carry symbolic meanings that help explain their origin and shape their effects in their effort to purify public life personnel systems send different ideological messages that affect trust in government and the social standing of former adversaries exclusive systems may establish trust at the expense of reconciliation while inclusive and reconciliatory systems may promote both trust and reconciliation in spite of its importance the topic of inherited personnel has received only limited attention in research on transitional justice and democratization lustration and transitional justice is the first attempt to fill this gap combining insights from cultural sociology and political psychology with the analysis of original experiments historical surveys parliamentary debates and interviews the book shows how perceptions of tainted personnel affected the origin of lustration systems and how dismissal exposure and confession affected trust in government reconciliation and collective memory
