

**built to sell creating a business that can thrive
without you**

in this volume are compiled from the more than
3 800 frequently asked questions on our
website which are read over 7 million times
each month some of the articles have been
translated into 150 languages many books
present teaching in a question and answer
format but few have delved into the questions
that people are actually asking having
received and answered more than 380 000
questions got questions ministries has a
unique understanding of what questions are
truly on peoples minds linguists and others
have realised for some time that predicates of
the know and wonder classes behave differently
in semantic terms with respect to their
interrogative complements but have not so far
fully understood how or why this book seeks to
explore and to provide solutions to this and to
related problems in explaining the meaning and
grammar of embedded interrogatives and the
predicates that take interrogative complements
the investigation extends to the semantics of
adverbs of quantification theories of plurals
and lexical selection the work is addressed to
those working in semantics and to
syntacticians concerned with the constraints
that syntactic structure imposes on semantic
interpretation it is at the heart of current
research in the syntax semantics interface
although some knowledge of formal semantics is
assumed the book has been written to be
accessible to researchers in computer science
philosophy and cognitive science
