our educational system is in turmoil many would argue that it has been assaulted and oversimplified by the right there is growing concern that we are becoming a liberal nation state with an increasingly anti liberal population and an electorate that is disinterested in politics in this globalized world the power of capital is so great that opposition to it is often discouraged and disheartened leaving many citizens few political precepts by which to consider their institutions this contemporary failure of vision has opened the way for the unimpeded return of the philosophy of the free market as a result social and educational policies are debated almost solely in terms of how they fit with the needs of the market social and ethical understandings are replaced by a failed economic theory that requires a radical constraint of our political and economic choices compassion for the poor the market lets us know is wrong headed because any interference with the labor market will always result in unfortunate economic and social

consequences moral issues are eclipsed by market needs in critical pedagogy where are we now the contributors discuss how the field of critical pedagogy should respond to such dire conditions in a way that is theoretically savvy and visionary while concurrently contributing to the struggle to improve the lives of those most hurt by them critical pedagogy is essential reading for every classroom teacher and pre service teacher it is also a valuable tool for use in undergraduate and graduate level classrooms

early reviews gem upon gem of insight a must read for all those who plan on being successful and who take the goal of achieving that success with the deadly focused and unwavering seriousness it deserves guy spier aquamarine fund manager i learned very much from it luca s books have my highest highlight density lance johnson whiteboard geeks ceo about the book the key to winning long term games is to stop playing them as a succession of separate short term games yet most people take the opposite approach here are three examples the manager who sees each interaction with her team as a separate game every time she talks to her subordinates it s to get things done rather than develop their skills as a result she fails to build the long term assets a competent team she needs in order to win her long term game a successful career the spouse who lies as a way to avoid responsibility if lying has say a 1 chance of getting discovered it s a great short term tactic it succeeds 99 of the time but a terrible long term strategy if you lie once a week you have a 99 5 chance of getting caught over a decade the solopreneur who sends weekly emails to their mailing list and sees each as a separate game therefore they consume their audience s trust to generate more sales within a single email instead of building trust to create more sales within a few months these three examples show that approaching long term games as a succession of separate short term games is a bad strategy despite working great over short time horizons instead you should play short term games not to win them but to progress your long term objectives this book

teaches you how to do that and much more how to design and execute reproducible success strategies how to pre-empt failure and learn from the failures of others etc foreword by Guy Spier about the author Luca Dellanna is a management advisor and the author of 9 books he has been featured on NudgeStock the largest behavioral sciences conference and eContalk among others more than 25,000 people around the world read Luca regularly Luca is known for being probably the only consultant at the intersection of risk management under uncertainty operational know-how and behavioral psychology he also strongly believes in the importance of teaching not just what the right thing to do is but also how to do it right
