this book introduces experimental design and data analysis interpretation as well as field monitoring skills for both plants and animals clearly structured throughout and written in a student friendly manner the main emphasis of the book concentrates on the techniques required to design a field based ecological survey and shows how to execute an appropriate sampling regime the book evaluates appropriate methods including the problems associated with various techniques and their inherent flaws e g low sample sizes large amount of field or laboratory work high cost etc this provides a resource base outlining details from the planning stage into the field guiding through sampling and finally through organism identification in the laboratory and computer based data analysis and interpretation the text is divided into six distinct chapters the first chapter covers planning including health and safety together with information on a variety of statistical techniques for examining and analysing data following a chapter dealing with site characterisation and general aspects of species identification subsequent chapters describe the techniques used to survey and census particular groups of organisms the final chapter covers interpreting and presenting data and writing up the research the emphasis here is on appropriate wording of interpretation and structure and content of the report

Expedition Agroparks 2011-05-25

this book is the result of several years of expedition into the development of metropolitan foodclusters the author s fascination for the agricultural landscapes in and around metropolises led him to the conclusion that improving the efficiency of agriculture is the most effective way to safeguard the quality of such landscapes the wasteful modes of production developed in the past 150 years have led to a serious decline in both the surface area and the quality of the highly valued landscapes closing the loops within the agricultural production system and increasing their productivity is therefore the best remedy to arrest this decline after analysing the development of agriculture against the background of the urbanisation process in today s network society the focus shifts to research by design on agroparks these are spatial clusters of agrofuctions and the related economic activities agroparks bring together high productivity plant based and animal based production and processing along industrial lines combined with the input of high levels of knowledge and technology the cycles of water minerals and gases are skillfully closed and the use of fossil energy is minimised particularly by the processing of various flows of waste products and by products an agropark may therefore be seen as the application of industrial ecology in the agrosector the scientific aim of this book is to find answers to the questions of whether agroparks contribute to sustainable development in metropolises how an agropark is developed and how it must be designed under examination are seven designs for agroparks which were created from 2002 onwards in the netherlands china and india

the confederacy had a great opportunity to turn the civil war in its favor in 1864 but squandered this chance when it failed to finish off a union army cornered in louisiana because of concerns about another union army coming south from arkansas the confederates were so confused that they could not agree on a course of action to contend with both threats thus the union offensive advancing from arkansas saved the one in louisiana and became known to history as the camden expedition the camden expedition is intriguing because of the might have beens had the key players made different decisions the author contends that if frederick steele commander of the federal vii army corps had not received a direct order from general ulysse s grant to move south disaster would have befallen not only the army of the gulf in louisiana but the entire union cause and possibly would have prevented abraham lincoln from winning reelection

a vivid account of ernest Shackleton's 1907 antarctic expedition and the cases of Mackinlay's single malt whisky that he left behind the incredible tale of Antarctica malt whisky and an epic journey Sir Ernest Shackleton's world fame is founded on the endurance expedition of 1914-17 an attempt to cross the antarctic continent that was foiled by the crushing of his ship in pack ice the heroics that followed ensured that Shackleton and his men would forever have a place in the annals of polar history and world exploration but Shackleton had come south seven years prior leading the 1907 British Antarctic Expedition and targeting the south pole from the opposite side of Antarctica rarely did Shackleton consume strong drink and on his expeditions he tolerated only a mild spree at times of celebration but in 1907 25 cases 300 bottles of rare old Highland Malt Whisky whisky three cases of which would ultimately lie forgotten beneath his hut at Cape Royds in the McMurdo Sound region for over 100 years were loaded aboard his ship the Nimrod the discovery of

the whisky in 2007 and its subsequent reblending by the mackinlay distillery inspired neville peat to reexamine and explore shackleton's first antarctic expedition the heroic era of antarctic exploration and the craft and lore behind scotland's finest dram

maps play an indispensable role in indigenous peoples efforts to secure land rights in the americas and beyond yet indigenous peoples did not invent participatory mapping techniques on their own they appropriated them from techniques developed for colonial rule and counterinsurgency campaigns and refined by anthropologists and geographers through a series of historical and contemporary examples from nicaragua canada and mexico this book explores the tension between military applications of participatory mapping and its use for political mobilization and advocacy the authors analyze the emergence of indigenous territories as spaces defined by a collective way of life and as a particular kind of battleground
