Manual of Clinical Microbiology

2011-05-16

the most authoritative comprehensive reference in the field sets the standard for state of the science laboratory practice a collaborative effort of 22 editors and more than 260 authors from around the world all experienced researchers and practitioners in medical and diagnostic microbiology includes 149 chapters of the latest research findings infectious agents methods practices and safety guidelines indispensable to clinical microbiologists laboratory technologists and infectious disease specialists in hospitals clinics reference laboratories and more

Manual of Security Sensitive Microbes and Toxins

2014-04-08

security sensitive microbes viruses bacteria fungi and parasites and toxins which are often referred to as the select agents and toxins have the capacity to cause serious illness and death in humans animals and plants throughout history these microbes and toxins have been exploited in one form or another as biowarfare and bioterror agents that create fear and panic well beyond any actual physical damages they might cause manual of security sensitive microbes and toxins provides comprehensive state of the art coverage of microbes and toxins of biosecurity concern the ultimate goal is to increase our awareness of these agents and enhance our preparedness against any future bio emergencies the book begins with an introduction containing a brief overview of the historical aspects of security sensitive microbes and toxins this is followed by a concise summary of the current status in relation to the regulation of security sensitive microbes and toxins and a discussion of future development trends the book is divided into seven parts microbes and toxins affecting humans and animals viruses microbes and toxins affecting human and animals bacteria microbes and toxins affecting human and animals fungus and parasite microbes and toxins affecting human and animals toxins microbes affecting animals viruses microbes affecting animals bacteria microbes affecting plants written by experts in the relevant areas of research the chapters are authoritative reviews each one covering a single microbe or toxin with respect to its classification biology epidemiology pathogenesis identification diagnosis treatment and prevention the chapters also discuss the limitations of our current knowledge and challenges relating to improved detection and control of the microbe or toxin

Proceedings of Mechanical Engineering Research Day 2018

this ebook is a compilation of 234 papers presented at the 6th asia international conference on tribology asiatrib2018 kuching sarawak malaysia from 17 to 20 september 2018

The Art of Driving

2015-05-12

how to build and modify high performance manual transmissions by author paul cangialosi is a complete guide to all transmissions manual including theory and design disassembly inspection rebuilding tips and techniques and performance modifications borg warner t 10s st 10s and t 5s are covered as well as ford top loaders chrysler a833s and gm muncies peripheral systems are covered as well including clutches speedometers assemblies as well as shifters and shifter modifications also included are tables speedometer ratios for gm cars torque specs oil capacities and ratio charts of all the popular transmissions if you have any plan for rebuilding or improving your manual transmission this is the book for you

Proceedings of Asia International Conference on Tribology 2018

2018-09-17

with a population of about six hundred million people and a combined gnp of more than us 2.4 trillion the asean economic community aec is set to become the seventh largest economy in the world launched in december 2015 the aec unveiled initiatives to create a single market and production zone a competitive and equitable region and integrated links to the global economy asean champions seeks to address the role of the strong local firms in regional integration how these champions succeeded and endured despite facing adverse circumstances and the factors that facilitated or impeded their participation in regional integration the book provides insights for future firm and government led strategies to enhance the integration process by complementing current narratives that focus on macroeconomic socio political and trade considerations park ungson and francisco offer an enlightening and engaging read ideally suited to academics and professionals alike

ASEAN Champions

2016-12-15

derived from the renowned multi volume international encyclopaedia of laws this book provides a systematic approach to legislation and legal practice concerning energy resources and production in malaysia the book describes the administrative organization regulatory framework and relevant case law pertaining to the development application and use of such forms of energy as electricity gas petroleum and coal with attention as needed to the pervasive legal effects of competition law environmental law and tax law a general introduction covers the geography of energy resources sources and basic principles of energy law and the relevant governmental institutions then follows a detailed description of specific legislation and regulation affecting such factors as documentation undertakings facilities storage pricing procurement and sales transportation transmission distribution and supply of each form of energy case law intergovernmental cooperation agreements and interactions with environmental tax and competition law are explained its succinct yet scholarly nature as well as the practical quality of the information it provides make this book a valuable resource for energy sector policymakers and energy firm counsel handling cases affecting malaysia it will also be welcomed by researchers and academics for its contribution to the study of a complex field that today stands at the foreground of comparative law

Official Gazette

malaysia s natural resources and its well educated population are some of the many credentials that keep the country in good stead with priorities centred on preparing for the asean economic community in 2015 and steering the policy framework toward more inclusive political representation the economy is built around global trade and the government is working to encourage greater private investment malaysia s gdp per capita is the highest in south east asia with the exception of smaller countries like singapore and brunei darussalam reaching 10 548 in 2013 based on a gdp of 307 25bn and a population of almost 30m the country produces 39 of the world s palm oil and 44 of its exports and increasing global demand for the commodity bodes well for the industry malaysia has seen its stock rise in the world was bank s annual the ease of doing business report moving up to 6th position in 2014 from 8th the previous year s avatar recent times have seen the government push hard for a greater role for the private sector in the country s development with the various government programmes aiming to boost transparency accountability and sustainable growth the overall aim of these plans is to elevate malaysia to become a high income country by 2020

with continuous restrictions on emission standards and demands for higher driving comfort the

calibration of shift quality is linked deeply and widely to automated transmission control algorithms this calibration process is typically implemented with real vehicles on the road under poorly reproducible conditions where the calibration engineer has no other choice but to try different control parameters till the subjective assessment on the shift quality meets certain requirements such as shifting comfort or sportiness compared with today's multiplying number of variants in vehicle engine transmission combinations and exponential growth of control parameters this traditional method is backward and costly an efficient way to rise to the challenge is the model based automatic calibration in contrast to the conventional shift quality calibration this novel method uses a closed loop approach based on a dynamic model instead of human know how a shift quality correlated position trajectory is proposed compared to the traditional control parameter adjustment method the guided trajectory has a higher tolerance to the system's hardware components and a better compatibility with tcus from diverse suppliers since shift quality is not restricted to a general summarized grade e g comfort and sportiness are always two conflicting influence factors in the terms of shift quality calibrations a multi objective evolutionary algorithm is applied to search the set of pareto optimal front which includes all the optimal compromised control parameters of the gear shifting trajectory for possible choice in this work a hydro mechanical amt synchronization system is used as an example to explain the proposed optimization process a modelica based non linear hydro mechanical amt system is modeled which describes the transient behavior during gear shifting in detail an effective fuzzy sliding mode position controller is designed for the referenced position tracking during synchronization in contrast to the conventional trial and error tuning method a genetic algorithm is applied to automatically identify and optimize the sliding mode controller parameters a novel multi objective evolutionary algorithm mlia is developed to find out the optimal control set for the synchronization trajectories verification at a transmission test bench shows that this model based multi objective optimization method has a guiding capability in automated transmission calibration mit deutlich strenger gesetzlichen anforderungen hinsichtlich der abgasemissionen und einer zunehmend anspruchsvoller nachfrage bezüglich des fahrkomforts rückt die frage nach der schaltqualität stärker in den fokus der getriebeentwicklung die kalibrierung umgangssprachlich die applikation ist deshalb ein schwerpunkt bei der entwicklung von algorithmen für die schaltqualität von automatisierten getriebesteuerungen der kalibrierungsprozess wird in der regel im fahrzeugversuch auf der straße durchgeführt der applikationsingenieur versucht unter diesen nicht reproduzierbaren bedingungen verschiedene steuerparameter zu adaptieren dies wird für eine schaltung solange durchgeführt bis die subjektive beurteilung der schaltqualität und die zugehörigen eigenschaften wie zum beispiel schaltkomfort und sportlichkeit erfüllt ist dieser beschriebene prozess ist zeit und personalaufwendig was mit dem aktuellen angebot an motor getriebe fahrzeugvarianten kaum bewältigt werden kann als weitere herausforderung steigt die anzahl der kalibrierbaren parameter der regler und steuerungsmethoden stetig um die kundenbedürfnisse zu befriedigen weshalb auch aus kostensicht ein besserer prozess gefunden werden muss eine effiziente möglichkeit zur lösung der skizzierten problemstellungen ist die modellbasierte automatische kalibrierung im gegensatz zu der herkömmlich auf fahrversuche basierende kalibrierung der schaltqualität verwendet dieses neue verfahren ein dynamisches modell in einer geschlossenen schleife anstelle des applikationsingenieurs für die fahrvorgaben wird in der schleife ein fahrerregler und ein optimierungsalgorithmus verwendet um so eine hohe reproduzierbarkeit des schaltereignisses sicherzustellen es wird vorgeschlagen die bewegung der schaltstellung zu optimieren da diese mit der schaltqualität korreliert diametral steht dem die allgemein übliche regleranpassung verschiedener parameter für die synchronisation gegenüber die vorgeschlagene methode der geführten schaltbewegung weist eine deutlich höhere toleranz gegenüber der varianz an hardwarekomponenten und damit eine bessere kompatibilität zu den getriebesteuergeräten tcus verschiedener lieferanten auf die schaltqualität lässt sich nicht auf ein subjektives kriterium zusammenfassen es werden immer unterschiedliche faktoren wie z b komfort und sportlichkeit den schaltvorgang bestimmen deshalb wird für die optimierung des schaltvorgangs eine mehrkriterieller evolutionärer algorithmus angewandt um die paretofront zu identifizieren was alle kompromisse der schaltbewegungsregelung einschließt es wird ein modell eines hydromechanischen synchronisationssystems für ein automatisiertes getriebe als beispielanwendung benutzt um den vorgeschlagenen optimierungsprozess zu demonstrieren das nichtlineare hydromechanische synchronisationssystem wird mit der objektorientierten sprache

modelica modelliert mit dem modell werden schaltvorgänge detailliert beschrieben ein fuzzy sliding mode regler wird für die jeweilige bewegung der schaltung während der synchronisation benutzt im gegensatz zur herkömmlichen empirischen anpassung der reglerparameter wird ein genetischer algorithmus angewendet um die automatische erkennung und bewertung der parameter vom fuzzy sliding mode regler zu optimieren ein neuartiger evolutionärer mehrkriterieller algorithmus mlia wurde angewandt um eine optimale bewegung der schaltstellung während der synchronisierung zu finden die validierung am getriebefahrzeug zeigt dass diese modellbasierte methode der mehrkriteriellen optimierung in der automatisierten getriebekalibrierung eine deutliche verbesserung darstellt

The Medical Journal of Malaysia

1990

this ground breaking book explores a rapidly developing aspect of contemporary life automated and autonomous spatial mobilities and their social and urban implications presenting a wide ranging discussion on autonomous vehicle av development and its future adoption this highly topical book points to the emergence of autonomously mobile cities and the new mobility landscapes they will present academics as well as practitioners in the fields of mobility transportation urban planning geography and sociology will find this an essential read

when conducting research in developing countries an ability to negotiate a bewildering array of cultural and logistical obstacles is essential overseas research a practical guide distills essential

lessons from scores of students and scholars who have collected data and done fieldwork abroad including how to prepare for the field how and where to find funding for one's fieldwork issues of personal safety and security and myriad logistical and relational issues by encouraging researchers to think through the challenges of research before they begin it overseas research will help prepare fieldworkers for the practical logistical and psychological considerations of very demanding work help save valuable time make the most of scarce financial resources and enhance the quality of the field research this third edition contains new material on social media including representation of research subjects collaborators students digital branding and image and representing universities abroad when posting publicly it also covers emerging technologies such as solar panels for power in remote locations new ways of digitally sending and receiving money and incorporates more perspectives of women lgbtq people and people of color researching abroad the book will be of interest to overseas fieldworkers and also to undergraduates in subjects such as anthropology economics geography history international studies politics sociology and development studies
