this volume is an essential reference guide that draws together an impressive collection of academics and religious practitioners to map out for the first time the religious multiplicity and diversity of wales for the first 1 500 years or so of its existence the christian church in wales was a unified entity the welsh church initially celtic but then roman catholic held a virtual monopoly over religious life and belief in the country the 16th century reformation ended the notion of a monolithic christendom the proliferation of protestant sects guaranteed that competition and variety would be the norm by charting the gradual proliferation of religious communities in wales from the 17th to the 21st centuries this volume seeks to dispel many of the myths of a monochrome christian protestant or even nonconformist wales each chapter also uniquely examines the persistence of faith often in surprising places in post christian wales the following religious institutions are discussed the church in wales independents congregationalists baptists the religious society of friends quakers roman catholicism calvinistic methodism wesleyan methodism the moravian church unitarianism salvation army pentecostalism united reform church seventh day

excerpt from the established church in wales being a short account of its origin its development and its maturity this has occasioned the disadvantage of not knowing the strength or weakness as affecting the dissenting position and views of certain lines of argument accordingly what is advanced with confidence on the one side is sometimes received with derision on the other doubtless at times an ignorant and conceited derision but not always so it is not too much to say that ignorance of the present actual position of the church in wales is fostered
