A Swedenborg Perpetual Calendar 2023-10-10 on this day a perpetual calendar for family genealogy if you are a genealogy buff like i am you love to mention your ancestors in blogs and status posts birthdays and wedding dates mean so much to people like us but how many times have dates slipped by unnoticed or we've missed them by mere days or weeks we need a way to record and organize our family's special dates in the old days the traditional family bible was used to record events but professional and amateur genealogists know when you uncover as many family members as we have a bible is not going to be large enough to record family events a calendar would be the obvious choice but the little squares on a commercial calendar are too small especially if you have four ancestors born on the same date and the days of the weeks would be incorrect depending on the year the original event took place an online perpetual calendar is cumbersome it took me four hours to upload dates for my immediate family of thirteen imagine how long it would take to upload the birthdays death dates and marriage dates of the 9 000 people in my family tree these are the reasons i created on this day a perpetual calendar for family genealogy this book features a convenient 6 x 9 inch paperback format that will rest out of the way in any drawer or on any shelf yet be instantly accessible when you need it 366 dates yes it includes leap year to record all of your family's special events add your own year to every event locate any date in the book in moments and easily add information as you discover it extra pages at the end of the book for details notes or memories safely store wedding programs funeral cards obituaries and

birth announcements between the pages to pass on to future generations record your ancestor's special dates today in an easy to use book that you can thumb through in an instant is today your great grandmother's birthday is tomorrow the anniversary of when your ancestors came to america now you can easily look in your book and find out

A Year of Crochet Stitches 2023-11-07 excerpt from a perpetual calendar for old and new style by the julian calendar the year consisted of 365 days and 6 hours instead of the true time of the duration of a solar year thus making the year too long by about 11 minutes from the time of the council of nice to the time of gregory this difference had amounted to ten days in order to obviate this error it was ordained that the year 1582 should consist of 365 days only and that ten days between the 4th and 15th of october should be thrown out of the calendar of that year and also to prevent further irregularity that no year terminating a century should be bissextile excepting each fourth of such years three days are thus retrenched in every four hundred years because the lapse of eleven minutes for every year makes very nearly three days in that period leaving an error of one day only in about 5200 years about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
