strategies reference source for academics and professionals in geo mechanical and geo technical engineering and others involved with research des homeland security and context in the geographical dimensions of terrorism gdot cutter et al 2003 the first book after 9 11 to address homeland security and geography we developed several thematic research agendas and explored intersections between geographic research and the importance of context both geographical and political in relationship to the concepts of terrorism and security it is good to see that a great deal of new thought and research continues to flow from that initial research agenda as illustrated by many of the papers of this new book entitled geospatial technologies and homeland security research frontiers and future challenges context is relevant not only to understanding homeland security issues broadly but also to the conduct of research on geospatial technologies it is impossible to understand the implications of a homeland security strategy let alone hope to make predictions conduct meaningful modeling and research or assess the value and dangers of geospatial technologies without consideration of overarching political social economic and geographic contexts within which these questions are posed this licensing and operations manual for collective management organizations in nigeria drafted jointly by the nigerian copyright commission ncc and wipo aims to empower the nigerian collective management organizations cmos by providing practical and up to date information on cmo operations focusing on licensing negotiations and tariff setting including digital rights the manual is designed to promote a culture of transparency and good practices within cmos enabling them to design
