

Jainism and Ethical Finance 2017-04-07 the financial crisis of 2008 has led to a re evaluation of the role of financial institutions and their relationship with the wider economy and society this process has meant an increased questioning of both the conduct of business itself and the principles behind commercial and financial activities yet non western voices have been notably absent from this debate as have alternatives to the dominant western derived economic ideologies from the ancient spiritual wisdom or dharma of the jains there emerges a practical modern philosophy fully in tune with the re emergence of india as a global economic power jain individuals businesses and charities have played a powerful role in india s rise and within the global indian diaspora jain communities are noted everywhere for their contributions to business the professions and science these successes are based on the principles of interdependence and co operation with an emphasis on long term consolidation rather than short term bursts of growth researchers and students interested in the ethics of finance accounting and economics will find jainism and ethical finance a scholarly and illuminating evaluation of jain dharma as a non western case study in the light of current concerns about the way global finance and banking systems operate this book offers a timely alternative perspective

Artificial Intelligence and its Impact on Business 2020-06-01 artificial intelligence ai technologies are one of top investment priorities in these days they are aimed at finding applications in fields of special value for humans including education the fourth industrial revolution will replace not only human hands but also human brains the time of machines requires new forms of work and new ways of business education however we must be aware that if there is no control of human chatbot interaction there is a risk of losing sight of this interaction s goal first it is important to get people to truly understand ai systems to intentionally participate in their use as well as to build their trust because the measure of success for ai applications is the value they create for human lives stanford university 2016 33 consequently society needs to adapt to ai applications if it is to extend its benefits and mitigate the inevitable errors and failures this is why it is highly recommended to create new ai powered tools for education that are the result of cooperation between ai researchers and humanities and social sciences researchers who can identify cognitive processes and human behaviors this book is authored by a range of international experts with a diversity of backgrounds and perspectives hopefully bringing us closer to the responses for the questions what we should teach what the right set of future skills is how we should teach the way in which schools should teach and assess them and where we should teach what implications does ai have for today s education infrastructure we must remember as we have already noticed before education institutions would need to ensure that that they have an appropriate infrastructure as well as the safety and credibility of ai based systems ultimately the law and policies need to adjust to the rapid pace of ai development because the formal responsibility for appropriate learning outcomes will in future be divided between a teacher and a machine above all we should ensure that ai respect human and civil rights stachowicz stanusch amann 2018

Cerebral Cortex 2012-12-06 this volume is devoted to mathematical models of the cortex computational models of individual neurons and ensembles of neurons are
