Essential Questions and Answers on the Gospel of the Kingdom (Selections II) 2024-01-21 this book is the first to present a comprehensive theory of non canonical questions those question types that do not only request information from the addressee but rather additionally tell us something about the speaker s epistemic and or emotional state such as can t find the value questions echo questions rhetorical questions and surprise questions while much recent research has explored the formal semantics and the phonetics and phonology of both canonical and non canonical questions the literature is still lacking a comprehensive account from a syntax pragmatics perspective that brings together the multiple findings and strands of research from the last twenty years the standard view in the syntax pragmatics literature is that most special interpretations of non canonical questions involve syntactic projections at or even above the level of illocutionary force in this work andreas trotzke argues that this approach is a mistake and proposes a new alternative theory of non canonical questions in which both their special pragmatics and their syntax as well as in many cases their emotive component can be derived solely from propositional level operators that do not affect the illocutionary level of utterances and can be found across illocutionary forces this account dramatically simplifies the syntactic analysis of non canonical questions and is also able to capture some previously unobserved data in the discourse behavior of those question types
