inference control in statistical databases also known as statistical disclosure limitation or statistical confidentiality is about finding tradeoffs to the tension between the increasing societal need for accurate statistical data and the legal and ethical obligation to protect privacy of individuals and enterprises which are the source of data for producing statistics techniques used by intruders to make

inferences compromising privacy increasingly draw on data mining record linkage knowledge discovery and data analysis and thus statistical inference control becomes an integral part of computer science this coherent state of the art survey presents some of the most recent work in the field the papers presented together with an introduction are organized in topical sections on tabular data protection microdata protection and software and user case studies

coast lines have been and still are the central lines of civilization around the world with still increasing pressure from both sides the hinterland and the sea with all its foreseeable and unforeseeable impacts by means of nature or mankind while the response of nature to such impacts is flexible in the way that all morphological changes with all the consequences are tolerated as part of the system humanity cannot tolerate short term or long term changes without being threatened in its physical and economical existence the objectives of this advanced research workshop arw on environmentally friendly coastal structures were to contribute to the critical assessment of existing knowledge in the field of coastal and environmental protection to identify directions for future research in that area to promote close working relationships between scientists from different countries and with different professional experience the latest trends in research on coastal and environmental protection were summarized and developed during the meeting seventeen papers are presented in this book attempting to cover all related aspects as completely as possible coast engineering structures water sediments ecosystems in their complicated interaction
