Imagining the Forest

2012

forests have always been more than just their trees the forests in michigan and similar forests in other great lakes states such as wisconsin and minnesota played a role in the american cultural imagination from the beginnings of european settlement in the early nineteenth century to the present our relationships with those forests have been shaped by the cultural attitudes of the times and people have invested in them both moral and spiritual meanings author john knott draws upon such works as simon schama s landscape and memory and robert pogue harrison s forests the shadow of civilization in exploring ways in which our relationships with forests have been shaped using michigan its history of settlement popular literature and forest management controversies as an exemplary case knott looks at such well known figures as william bradford james fenimore cooper john muir john burroughs and teddy roosevelt ojobwa conceptions of the forest and natural world including how longfellow mythologized them early explorer accounts and contemporary literature set in the upper peninsula including jim harrison s true north and philip caputo s indian country two competing metaphors evolved over time knott shows the forest as howling wilderness impeding the progress of civilization and in need of subjugation and the forest as temple or cathedral worthy of reverence and protection imagining the forest shows the origin and development of both
