## **Representation Theory, Complex Analysis, and Integral Geometry**

2011-12-13

this volume targets graduate students and researchers in the fields of representation theory automorphic forms hecke algebras harmonic analysis number theory

## **European Congress of Mathematics**

2012-12-06

this is the first volume of the proceedings of the third european congress of mathematics volume i presents the speeches delivered at the congress the list of lectures and short summaries of the achievements of the prize winners as well as papers by plenary and parallel speakers the second volume collects articles by prize winners and speakers of the mini symposia this two volume set thus gives an overview of the state of the art in many fields of mathematics and is therefore of interest to every professional mathematician contributors r ahlswede v bach v baladi j bruna n burq x cabré p j cameron z chatzidakis c ciliberto g dal maso j denef r dijkgraaf b fantechi h föllmer a b goncharov a grigor yan m harris r iturriaga k johansson k khanin p koskela h w lenstra jr f loeser y i manin n s manton y meyer i moerdijk e m opdam t peternell b m a g piette a reznikov h schlichtkrull b schmidt k schmidt c simó b tóth e van den ban m f vignéras o viro

## **Lie Theory**

presents extensive surveys by van den ban schlichtkrull and delorme of the recent progress in deriving the plancherel theorem on reductive symmetric spaces well suited for both graduate students and researchers in semisimple lie theory and neighboring fields possibly even mathematical cosmology knowledge of basic representation theory of lie groups as well as familiarity with semisimple lie groups symmetric spaces and parabolic subgroups is required

## ***Hyperfunctions and Harmonic Analysis on Symmetric Spaces***

2012-12-06

this book gives an introductory exposition of the theory of hyperfunctions and regular singularities this first english introduction to hyperfunctions brings readers to the forefront of research in the theory of harmonic analysis on symmetric spaces a substantial bibliography is also included this volume is based on a paper which was awarded the 1983 university of copenhagen gold medal prize

## ***The Selected Works of Sigurdur Helgason***

2009

collects the articles that cover invariant differential operators geometric properties of solutions to differential equations on symmetric spaces double fibrations in integral geometry spherical functions and spherical transforms duality for symmetric spaces representation theory and the fourier transform on  $g/k$

## **Geometric Analysis and Integral Geometry**

2013

provides an historical overview of several decades in integral geometry and geometric analysis as well as recent advances in these fields and closely related areas it contains several articles focusing on the mathematical work of sigurdur helgason including an overview of his research by gestur olafsson and robert stanton

## **Group Representations, Ergodic Theory, and Mathematical Physics**

2008

george mackey was an extraordinary mathematician of great power and vision his profound contributions to representation theory harmonic analysis ergodic theory and mathematical physics left a rich legacy for researchers that continues today this book is based on lectures presented at an ams special session held in january 2007 in new orleans dedicated to his memory the papers written especially for this volume by internationally known mathematicians and mathematical physicists range from expository and historical surveys to original high level research articles the influence of mackey s fundamental ideas is apparent throughout the introductory article contains recollections from former students friends colleagues and family as well as a biography describing his distinguished career as a mathematician at harvard where he held the landon d clay professorship of mathematics
