provocative audacious and challenging this book rejuvenates not only the historical study of law but also the role of law schools by asking which stories we tell and which stories we forget it argues that a historical approach to law should be at the beating heart of the law school curriculum far from being archaic elitist and dull historical perspectives on law are and should be subversive comparison with the past underscores how the law and legal institutions are not fixed but are constructed that every line drawn in the law and everything the law holds as sacred is actually arbitrary and how the environment into which law students are socialised is a historical construct a subversive approach is needed to highlight question de construct and re construct the authored nature of the law revealing that legal change on a larger scale is possible far from being archaic this recasts legal history as being anarchic subversive legal history is not a type of legal history but is its defining characteristic if it is to be a central part of law school life it describes a legal method that should not be the preserve only of specialist legal historians but rather should be part of the toolkit of all law students teachers and researchers this book will be essential reading for all who work and study in law schools proposing a radical new approach not only to the historical study of law but also to the content purpose and ambition of legal education a subversive approach can revolutionise law schools providing a more ambitious legal education which is grounded in the socio legal reality helping to ensure that today s law students are better equipped to be the professionals and citizens of tomorrow

dx doi org 10 12946 gplh6 epubli de shop buch 53894 the spatiotemporal conjunction is a fundamental aspect of the juridical reflection on the historicity of law despite the fact that it seems to represent an issue directly connected with the question of where legal history is heading today it still has not been the object of a focused inquiry against this background the book s proposal consists in rethinking key confluences related to this problem in order to provide coordinates for a collective understanding and dialogue the aim of this volume however is not to offer abstract methodological considerations but rather to rely both on concrete studies out of which a reflection on this conjunction emerges as well as on the reconstruction of certain research lines featuring a spatiotemporal component this analytical approach makes a contribution by providing some suggestions for the employment of space and time as coordinates for legal history indeed contrary to those historiographical attitudes reflecting a monistic conception of space and time as well as a eurocentric approach the book emphasises the need for a

delocalized global perspective in general terms the essays collected in this book intend to take into account the multiplicity of the spatiotemporal confines the flexibility of those instruments that serve to create chronologies and scenarios as well as certain processes of adaptation of law to different times and into different spaces the spatiotemporal dynamism enables historians not only to detect new perspectives and dimensions in foregone themes but also to achieve new and compelling interpretations of legal history as far as the relationship between space and law is concerned the book analyses experiences in which space operates as a determining factor of law e g in terms of a field of action for law moreover it outlines the attempted scales of spatiality in order to develop legal historical research with reference to the connection between time and law the volume sketches the possibility of considering the factor of time not just as a descriptive tool but as an ascriptive moment quasi an inner feature of a legal problem thus making it possible to appreciate the synchronic aspects of the juridical experience as a whole the volume aims to present spatiotemporality as a challenge for legal history indeed reassessing the value of the spatiotemporal coordinates for legal history implies thinking through both the thematic and methodological boundaries of the discipline

lori chambers fascinating study explores the legal history of adoption in ontario since the passage of the first statute in 1921 this volume explores a wide range of themes and issues in the history of adoption including the reasons for the creation of statutory adoption the increasing voice of unmarried fathers in newborn adoption the reasons for movement away from secrecy in adoption the evolution of step parent adoption the adoption of indigenous children and the growth of international adoption unlike other works on adoption chambers focuses explicitly on statutes statutory debates and the interpretation of statutes in court in doing so she concludes that adoption is an inadequate response to child welfare and on its own cannot solve problems regarding child neglect and abuse rather chambers argues that in order to reform the area of adoption we must first acknowledge that it is built upon social inequalities within and between nations
