The Election of Israel 1995-05-04

in this book david novak conducts an historical philosophical and theological reflection on the central jewish doctrine of israel s election by god also known as the idea of the chosen people historically he analyses the great change in modern jewish thought brought about by spinoza s inversion of the doctrine that it was not god who elected israel but israel who elected god the development of that inversion is illustrated by the thought of the german philosopher theologian hermann cohen philosophically novak explores the ontological implications of the two differing theologies of election theologically he argues for the correlation of election and revelation and maintains that a theology of election is required in order to deal with two central questions namely who are the jews and how are jews to be related to the world the constructive picture which results leads to a fresh understanding of jewish modernity

a controversial examination of the internal israeli debate over the israeli palestinian conflict from a best selling israeli author since the six day war israelis have been entrenched in a national debate over whether to keep the land they conquered or to return some if not all of the territories to palestinians in a balanced and insightful analysis micah goodman deftly sheds light on the ideas that have shaped israelis thinking on both sides of the debate and among secular and religious jews about the israeli palestinian conflict contrary to opinions that dominate the discussion he shows that the paradox of israeli political discourse is that both sides are right in what they affirm and wrong in what they deny although he concludes that the conflict cannot be solved goodman is far from a pessimist and explores how instead it can be reduced in scope and danger through limited practical steps through philosophical critique and political analysis goodman builds a creative compelling case for pragmatism in a dispute where a comprehensive solution seems impossible

introduction the basic obligations of a state towards its nation s are to provide justice control of powers of organizations or individuals peace advancement of understanding including science and economy freedom although essential is secondary and a consequence of justice and control of powers since its creation in 1948 israel under zionism jewish nationalism by reliance on international power s has become a state of abuse of powers inherited from world powers a place of anti humanity acts against the humane formal principles that it was founded on and a prophet of transfer forced migration of the nations who helped its people to be transferred in the region in short an inconsistency in the consistent humanity that arose from that region there is a new enlightenment in the world however due to post era realities of the events end of the cold war fall of the soviet union christian revolution in poland islamic revolution in iran uprisings in islamic world such as intifada uprising of palestinians and rise of al qaeda defeat of israel by hesbollah in lebanon and re evaluation of south american and african countries of their political and economical situations on one hand and catastrophes of war in iraq and the military assault on gaza strip on the other hand based on this enlightenment the people of the world adhere to i demand for maintaining the holy land land of prophets as a sacred region for all three great religions of judaism christianity and islam that have deep historical roots in the region by reliance on their practical objectives which are peace and justice for mankind and not on their subjective theological ideas due to interpretations which may be wrong or unacceptable to the majority of the faithful for unification of humanity to promote peace and humanity justice around the world dominated by these three religions on one hand and to prevent disastrous events such as crusade wars or dominance by world powers such as roman empire on the other hand ii remove the threat to the world peace and the strategy of human transfer in the middle east created by the dominant secular zionist ideology that exploits judaism and christianity under the unfounded theology of dispensationalism of john nelson darby devised before 1917 in great britain and presumed to be a basis for the balfour declaration in 1917 iii speak in a unified religious basis that the problem of palestinian and israelis can not be solved by ignoring the atrocities of israeli government towards people of palestine by killing them purposefully as a result of strategy of transfer looking at them inhumanely and using the historic anti humanity tactics of the king herod around 18 bce who killed and enslaved even jews for the abuse of roman empire against them and instead obligate it to choose the humane tactics of moses and on the spectrum of power require the united states as a christian country to choose between roman empire ideas and the jesus ideas of humanity in its foreign policies the rights of palestinians in all aspects should be realized as justice suggests and not as the power imposes it is time for the people of the world to re negotiate the establishment of israel on the basis of the principles promised to the nations of the world in 1947 and 1948 in this re negotiation the major goal must be the creation of a political system in the present state of israel that guarantees independence of nations equal rights of all nations peace and humanity justice between the nations and ends the suffering of people of palestine by abusive power of zionists this book based on the beliefs of it s author in a humane and just way to resolve the conflict in the middle east suggests a bi national federal system for a state consisting of nations of palestinians moslem or christians and jews under provision

The Zionist Idea 1997

the tension between secular politics and religious fundamentalism is a problem shared by many modern states this is certainly true of the state of israel where the religious secular schism provokes conflict at every level of politics and society driving this schism is the idea of the halakhic state the demand by many religious jews that israel should be governed by the law of the torah as interpreted by orthodox rabbis understanding this idea is a priority for scholars of israel and for anyone with an interest in its future the invention of jewish theocracy is the first book in any language to trace the origins of the idea to track its development and to explain its crucial importance in israel s past and present the book also shows how the history of this idea engages with burning contemporary debates

on questions of global human rights the role of religion in middle east conflict and the long term consequences of european imperialism the invention of jewish theocracy is an intellectual history based on newly discovered material from numerous israeli archives private correspondence court records and lesser known published works it explains why the idea of the halakhic state emerged when it did what happened after it initially failed to take hold and how it has regained popularity in recent decades provoking cultural conflict that has severely shaken israeli society the book's historical analysis gives rise to two wide reaching insights first it argues that religious politics in israel can be understood only within the context of the largely secular history of european nationalism and not as is commonly argued as an anomalous exception to it it shows how even religious jews most opposed to modern political thought nevertheless absorbed the fundamental assumptions of modern european political thought and reread their own religious traditions onto that model second it demonstrates that religious secular tensions are built into the intellectual foundations of israel rather than being the outcome of major events like the 1967 war these insights have significant ramifications for the understanding of the modern state in particular the account of the blurring of the categories of secular and religious illustrated in the book are relevant to all studies of modern history and to scholars of the intersection of religion and human rights

The Invention of Jewish Theocracy 2020-01-22

the idea of peace is always enchanting for it encompasses the tranquility and serenity for which every human yearns the nation of israel has never known peace but it dreams of peace in practice israel navigates between the poles of war and peace with endless middle of the road situations like cease fire truce armistice and other temporary cessations of hostilities the oslo idea traces the roots of the current campaign to delegitimize israel the campaign is not linked to israeli resistance to the absence of an acceptable settlement between israel and the palestinians or to israel's reluctance to abandon territory it results from a change of tactics by the palestinian leadership israeli argues that these tactics have been used to exhaust reduce and replace israel rather than produce a compromise half the palestinian people and other uncompromising arabs and muslims have stated that goal openly and act to achieve it raphael israeli deconstructs the immense illusion of the oslo peace accords which initiated the so called peace process he shows how oslo lured a naive israeli leadership into a trap he shows

how outside factors bent on finding and supporting an evasive peace have helped perpetuate the fiasco oslo represents he shows how oslo s supporters have advanced the peace process by coaxing and threatening israel behind the scenes and binding israel alone with the oslo commitments and their derivatives more importantly the author outlines and analyzes the basic and seemingly unbridgeable points of contention that remain security refugees settlements water borders and the status of jerusalem itself provided by publisher

an expanded edition of a classic intellectual history of zionism now covering the rise of religious zionism since the 1970s for eighteen centuries pious jews had prayed for the return to jerusalem but only in the revolutionary atmosphere of nineteenth century europe was this yearning transformed into an active political movement zionism in the making of modern zionism the distinguished political scientist shlomo avineri rejects the common view that zionism was solely a reaction to anti semitism and persecution rather he sees it as part of the universal quest for self determination in sharply etched intellectual profiles of zionism s major thinkers from moises hess to theodore herzl and from vladimir jabotinsky to david ben gurion avineri traces the evolution of this quest from its intellectual origins in the early nineteenth century to the establishment of the state of israel in an expansive new epilogue he tracks the changes in israeli society and politics since 1967 which have strengthened the more radical nationalist and religious trends in zionism at the expense of its more liberal strains the result is a book that enables us to understand as perhaps never before one of the truly revolutionary ideas of our time

Apple of Gold 2017-03-14

this volume deals with the modern fate of the traditional conception of jews as a covenanted people chosen to receive the law whose ultimate purpose is contributing to the universal salvation of mankind the author shows how under the influence of liberalism rationalism relativism and other enlightenment ideologies this idea was distorted denied inverted yet never entirely obliterated in his discussions of modern jewish thinkers and writers and the ideological and political struggles of zionism and the state of israel against enemies from without and from within alexander shows that the ancient idea of covenant is still alive today if only in the assumption that jewish life can lead somewhere so long as jews remember that it began somewhere ranging from literary criticism and the history of ideas to journalism and politics the book is unified by a point of view unabashedly espousing the jewish idea and challenging its enemies

Israel Salanter, Text, Structure, Idea 1982

this book provides unique insights into the profound religious and cultural issues underlying the increasingly ideological divisions within israeli society over the questions of territorial concessions and the future character of the state it explores the significant distinctions between modern zionism a primarily secular nationalist movement modeled after the european movements of the nineteenth century and the much older traditional jewish nationalism which is deeply rooted in ancient religion and culture dr sicker offers a concise overview of the 3 000 year intellectual history of jewish nationalism within which modern secular zionism represents a relatively brief although immensely important interlude that may be entering its final stage as other more traditional religious nationalist concepts seek to take its place as the national ideology of the state of israel an analysis of how jewish religious nationalism has shaped the history of the jews this book examines the national and territorial dimensions of classical judaism explains the survival of the nationalist idea despite the repeated loss of independence and the exile of the majority of the people from their homeland and demonstrates how the nineteenth century religious reform movement sought to counter both the growth of zionism and the resurgence of traditional jewish nationalism the book concludes with a discussion of the new ideological synthesis of judaism nationalism and the land of israel and its implications for the future of the jewish state

histories based on theories at best if not fiction the book is the first empirical investigation able to document this partial reporting of history seyed hadi borhani examines the most popular college level textbooks used to teach the history of the israel palestine in western universities combining textbook analysis to determine how the dominant academic texts report the question and a context analysis to identify who manufactures the dominant knowledge the book provides a historical map of how the israel palestine conflict is understood in the west the book can be used as a critique for students and professors to use alongside textbooks and is a vital and much needed intervention into the state of affairs in western academia

this book discusses the predicament of the israeli peace movement which paradoxically following the launching of the oslo peace process between israel and the palestinians in 1993 experienced a prolonged fatal decline in membership activity political significance and media visibility after presenting the regional and national background to the launching of the peace process and a short history of israeli peace activism the book focuses on external and internal processes and interactions experienced by the peace movement after some basic postulates of its agenda were actually although never explicitly embraced by the rabin government the book concludes that despite its organizational decline and the zero credit given to it by the policy makers in retrospect it appears that the movement contributed significantly to the integration of new ideas for possible solutions to the middle east conflict in the israeli mainstream political discourse

the fortunes of the jews of the diaspora from the earliest times until the twentieth century it is indeed
no exaggeration to say that the jews have been in europe for a longer period than some of the nations
