initial assessment and management of acute stroke uptodate

May 22 2024

immediate goals include minimizing brain injury treating medical complications and moving toward uncovering the pathophysiologic basis of the patient s symptoms patient assessment and management during the acute phase first few hours of an ischemic stroke will be reviewed here

what s new in neurology uptodate

Apr 21 2024

psychological distress and depression are common in patients with amyotrophic lateral sclerosis als but optimal management strategies are uncertain

neurology in clinical practice principles of diagnosis and

Mar 20 2024

the balance of coverage of the principles of clinical neurology the neurodiagnostic evaluation and the diagnosis and management of neurologic diseases is excellent deficiencies i found no major deficiencies

evidence based guideline management of an neurology

Feb 19 2024

management to evaluate evidence as to whether immediate aed treatment of an unprovoked first seizure in adults changes prognosis we considered 1 the short term risk for a seizure recurrence and 2 the longer term potential for seizure remission

evidence based neurology management of neurological

Jan 18 2024

from an expert editor team drawn from the cochrane neurological network evidence based neurology provides specialists and those in training with the skills and knowledge to apply evidence based practice in the clinical setting

current concepts in concussion initial evaluation and management

Dec 17 2023

brief cognitive and physical rest are key components of initial management initial management also involves patient education and reassurance and symptom management

a clinical practice guideline for the management of patients

Nov 16 2023

these guidelines provide new recommendations for blood pressure management after acute sci while acknowledging the limitations in the current evidence on the relationship between map and neurologic recovery

14 assessment and management of neurological problems 1

Oct 15 2023

the assessment and management of neurological symptoms presents a particular challenge in the community as the differential diagnosis may be wide and include potentially serious conditions

evidence based neurology management of neurological

Sep 14 2023

in evidence based neurology management of neurological disorders a carefully selected group of clinically experienced collaborators use the best available evidence to answer more than 100 clinical questions about the treatment and management of neurological disorders

blood pressure management in stroke neurology clinical practice

Aug 13 2023

we highlight the details of elevated blood pressure management in the hyperacute acute subacute and chronic stages of ischemic stroke and intracerebral hemorrhage

perioperative management of neurological conditions pmc

Jul 12 2023

most important consideration is the management and understanding of pathophysiology of these disorders and evaluation of new neurological changes that occur perioperatively perioperative generally refers to 3 phases of surgery preoperative intraoperative and postoperative

guidelines for the diagnosis and treatment of acute pubmed

Jun 11 2023

in 2016 the japanese society of child neurology published guidelines for the diagnosis and treatment of acute encephalopathy in childhood which made recommendations and comments on the general aspects of acute encephalopathy in the first half and on individual syndromes in

current management in child neurology pediatric neurology

May 10 2023

current management in child neurology is designed for use by primary care providers although it should prove equally useful for house officers and medical students in pediatrics and neurology practicing child neurologists also will find much of the information helpful particularly the newly added features

artificial intelligence in the management of neurological

Apr 09 2023

the purpose of this chapter is to provide valuable insights on various
