through most of western european history jews have been a numerically tiny or entirely absent minority but across that history europeans have nonetheless worried a great deal about judaism why should that be so this short but powerfully argued book suggests that christian anxieties about their own transcendent ideals made judaism an important tool for christianity as an apocalyptic religionÑcharacterized by prizing soul over flesh the spiritual over the literal the heavenly over the physical worldÑcame to terms with the inescapable importance of body language and material things in this world nirenberg shows how turning the jew into a personification of worldly over spiritual concerns surface over inner meaning allowed cultures inclined toward transcendence to understand even their most materialistic practices as spiritual focusing on art poetry and politicsÑthree activities especially condemned as worldly in early christian cultureÑhe reveals how over the past two thousand years these activities nevertheless expanded the potential for their own existence within christian culture because they were used to represent judaism nirenberg draws on an astonishingly diverse collection of poets painters preachers philosophers and politicians to reconstruct the roles played by representations of jewish ÕenemiesÕ in the creation of western art culture and politics from the ancient world to the present day this erudite and tightly argued survey of the ways in which christian cultures have created themselves by thinking about judaism will appeal to the broadest range of scholars of religion art literature political theory media theory and the history of western civilization more generally

twenty five years ago edward said s orientalism spawned a generation of scholarship on the denigrating and dangerous mirage of the east in the western colonial mind but the west is the more dangerous mirage of our own time ian buruma and avishai margalit argue and the idea of the west in the minds of its self proclaimed enemies remains largely unexamined and woefully misunderstood occidentalism is their groundbreaking investigation of the demonizing fantasies and stereotypes about the western world that fuel such hatred in the hearts of others we generally understand radical islam as a purely islamic phenomenon but buruma and margalit show that while the islamic part of radical islam certainly is the radical part owes a primary debt of inheritance to the west whatever else they are al qaeda and its ilk are revolutionary anti western political movements and buruma and margalit show us that the bogeyman of the west who stalks their thinking is the same one who has haunted the thoughts of many other revolutionary groups going back to the early nineteenth century in this genealogy of the components of the anti western worldview the same oppositions appear again and again the heroic revolutionary versus the timid soft bourgeois the rootless deracinated cosmopolitan living in the western city cut off from the roots of a spiritually healthy society the sterile western mind all reason and no soul the machine society controlled from the center by a cabal of insiders often jews pulling the hidden levers of power versus an organically knit together one a society of blood and soil the anti western virus has found a ready host in the islamic world for a number of legitimate reasons they argue but in no way does that make it an exclusively islamic matter a work of extraordinary range and erudition occidentalism will permanently enlarge our collective frame of vision

exploring family and community dynamics enemies of the country profiles men and women of the confederate states who in addition to the wartime burdens endured by most southerners had to cope with being a detested minority with one exception these featured individuals were white but they otherwise represent a wide spectrum of the southern citizenry they include natives to the region foreign immigrants and northern transplants affluent and poor farmers and merchants politicians and journalists slaveholders and nonslaveholders some resided in highland areas and in remote parts of border states the two locales with which southern unionists are commonly associated others however lived in the deep south and in urban settings some were openly defiant others took a more covert stand together the portraits underscore how varied unionist identities and motives were and how fluid and often fragile the personal familial and local circumstances of unionist allegiance could be for example many southern unionists shared basic social and political assumptions with white southerners who cast their lots with the confederacy including an abhorrence of emancipation the very human stories of southern unionists as they saw themselves and as their neighbors saw them are shown here to be far more complex and colorful than previously acknowledged

the passing of the cold war is the most important development of the late 20th century yet the united states clings tenaciously to old policies both the bush administration and democratic leaders have insisted on perpetuating a host of obsolete alliances including nato and the alliance with japan which cost american taxpayers nearly 150 billion a year ted galen carpenter director of foreign policy studies at the cato institute offers a provocative critique of that status quo strategy although washington s outdated alliances have no real adversary or credible mission carpenter says they hold the potential to embroil the united states in obscure conflicts ethnic and otherwise that have little relevance to america s legitimate security concerns as an alternative he proposes strategic independence under which the united states would act only to defend vital interests the republic s physical integrity political independence or domestic liberty carpenter calls for the foreign policy equivalent of zero based budgeting insisting that because of the dramatic changes in the world caused by the collapse of the soviet union all alliances must be justified anew regardless of any utility they may have had during the cold war he places under the microscope america s multilateral treaty obligations to defend other nations nato anzus which links the united states australia and new zealand and the rio treaty which provides a collective defense arrangement for the western hemisphere he also examines four important bilateral security agreements with japan south korea the philippines and pakistan this is the book on a new foreign policy for the united states
