round mountain was little more than a speck of a town about sixty miles outside of tonopah nevada when cal owens first visited the property in the late 1960s people had been trying to get gold out of round mountain since the early 1900s back in the early prospector days you simply pulled out your pick and shovel to dig up a little dirt and then found a bit of water for your pan as you teased those precious gold flakes and nuggets out the early miners were able to get to the ore at and near the surface people and companies continued to come and go through the 1950s they extracted gold but encountered more problems than their efforts were worth so what made cal owens an airline flight engineer and elwood dietrich a mining promoter think they could successfully mine this property when so many before had given up the interest was there the determination was there a few investors were there the work ethic was there and even the gold was there all that remained was getting the gold out of the ground ordrich gold reserves corporation ordrich was born as the group of investors grew larger buying the property was one thing but what to do next with elwood dietrich recovering from a stroke in arizona cal owens had no other choice than to figure it out as he talked to as many people as possible and learned as much as he could each step of the way he had the ability to ask questions and listen to experts a trait that goes a long way in this world holding down a full time job and raising four children with his wife viki did not consume all twenty four hours in a day so he thought he still had time to find a way to get the gold out of round mountain how hard could it be you simply had to get that pretty yellow stuff out of the ground and then mill the gold and refine it into gold bars cal quickly learned just how difficult it could be mining precious ore took knowledge expertise deep pockets and a willingness to dig into those pockets the ordrich partners could have lost their investment time and time again if it were not for the tenacity and stubbornness of cal owens

among the hordes of starry eyed argonauts who flocked to the california gold rush of 1849 was an australian named edward hargraves he left america empty handed only to find gold in his own backyard the result was the great australian rush of the 1850s which also attracted participants from around the world a south african named p j marais was one of them marais too returned home in defeat only to set in motion the diamond and gold rushes that transformed southern africa and so it went most previous historians of the gold rushes have tended to view them as acts of spontaneous nationalism each country likes to see its own gold rush as the one that either shaped those that followed or epitomized all the rest in the gold crusades a social history of gold rushes 1849 1929 douglas fetherling takes a different approach fetherling argues that the gold rushes in the united states canada australia new zealand and south africa shared the same causes and results the same characters and characteristics he posits that they were in fact a single discontinuous event an expression of the british imperial experience and nineteenth century liberalism he does so with dash and style and with a sharp eye for the telling anecdote the out of the way document and the bold connection between seemingly unrelated disciplines originally published by macmillan of canada 1988
