knowledge the vehicle of implicit and overt racism originally published in 1988 this author however saw no reason why the contemporary psychiatrist should not challenge this ethnocentrism he provides a critical account of the development of psychiatry in relation to its cultural context and then examined contemporary practice of the time in the light of this development throughout the book is informed by an awareness of issues of race and culture and of their difficult interactions the author emphasising both the frequency of racist attitudes and the very real cultural distinctions in our society distinctions that can be used to mask what are actually racist sentiments what emerges is not just a plea for an anti racist culture sensitive psychiatry but a blueprint for how this can be brought about he argued that the shift towards community work and social psychiatry could reorientate the profession by confronting it with its social setting and responsibilities this book represented a significant contribution to this literature for all mental health professionals and social scientists with an interest in this field at the time the author has gone on to write many more

in the 1980s transcultural psychiatry was a developing field which was commanding increasing attention for three major reasons first many societies were becoming more and more multicultural and therefore professional health workers needed to be aware of the needs and background of ethnic groups as well as to be familiar with their own cultural assumptions secondly the study of psychiatric illness across cultures can illuminate features of such an illness in our own society thirdly the way in which racism may initiate or sustain psychiatric disorder had become a topic essential to a present day understanding of transcultural psychiatry originally published in 1986 this book provides a review of many such aspects of transcultural psychiatry it is written at a level suitable for mental health professionals including trainee psychiatrists but would also interest students and other qualified staff including psychologists nurses social workers and other professional workers concerned with race relations and the provision of psychiatric services for ethnic groups
