private sectors and regions provide accurate and clear information and encourage calm response

global report on drowning preventing a leading killer

Sep 07 2022

drowning is a serious and neglected public health threat claiming the lives of 372 000 people a year
worldwide more than 90 of these deaths occur in low and middle income countries this death toll is
almost two thirds that of malnutrition and well over half that of malaria but unlike these public
health challenges there are no broad prevention efforts that target drowning
