Mergers in Higher Education 2010-01-01

the merger is broadly understood as a fusion of two or more units into one the merger in higher education has received much attention by policy makers as well as individual institutions in many countries as a means to bring higher education reforms the merger of higher education institutions is a visible phenomenon in the recent past but each merger provides a distinctive instance of major strategic change besides this each merger also shows a distinct set of circumstances actors and characteristics the aims of the mergers have been varied across the nations that include a reduction in fragmentation of institutions economies of scale enhanced efficiency enhanced quality etc along with disapproval a great amount of literature surrounding the benefits of the merger has emerged over the period of time in spite of ample literature on mergers of higher education institutions there does not appear to be a clear set of financial efficiency or quality parameters to assess the success the majority of the discussions have been narratives in the available literature the mergers have been classified based on their participants stakeholders nature the strategy that drives them their motivation and or the resultant degree of absorption this book discusses the merger experiences and case study of different countries in terms of policies and practices each country chapter in the above context narrates that in planning the mergers what have been the philosophical economic political legal and cultural implications how the factors such as institutional history geographical distance provincial tradition state regulations the presence of collective bargaining and pertinent financial matters shaped the process as well as the outcome of the mergers the idea of merger and its implementation including process at both government and institutional level have been discussed the outcome assessment also forms the part of the discussion

OUTCOME-BASED CURRICULUM IN ENGINEERING EDUCATION 2023-05-31

engineering education has emerged as a fast developing discipline in itself with universities across the world opening up exclusive departments of engineering education which is also impacting the socio economic system in india most of the engineering institutions in india are part of the hub and spoke university education system unique to india scientifically developing the outcome based curriculum obc uniformly across india has been a daunting task due to the dearth of an authentic book on obc addressing the need of the indian engineering education system this being the first book of its kind in india and with obc serving as the constitution of outcome based education obe it will go a long way to address this need the unique feature of this book is that it is replete with examples to explain the various concepts of planning designing and implementing the obc in engineering institutions different aspects of outcome based teaching learning obtl and outcome based assessment oba are also discussed vividly apart from the examples weaved into the lucidly written seven chapters additional examples and important formats are provided in the annexures another unique feature of this book every engineering ug pg or diploma teacher would be happy to possess a personal copy of this book for 24x7 access which will help

to clear their doubts as it arises then and there target audience technical instruction technical teacher trainers curriculum specialists instructional designers education policy makers what the reviewers say the technical education has to adopt outcome based curriculum and there was a dire need of authentic literature which would serve as a base document for scientifically developing obc the book reflects the expertise of both the authors who have more than 30 years of experience in industry and academics in designing and implementing different variants of obc for various technical education programmes such a book will serve as a reference for future generations to avoid re inventing the wheel again and again dr m p poonia vice chairman aicte national institute of technical teacher training and research nitttr bhopal has been spearheading different forms of obc for the last five decades in which the authors have contributed substantially care has been taken such that this book will not only benefit the indian engineering education system but also the engineering teaching fraternity at the international context dr c thangaraj director nitttr bhopal
