section 26 problem 1 solution dbfin Dec 10 2022

James R. Munkres: If X is compact then X is compact. Suppose one is finer than the other then the identity mapping from the finer one to the coarser one is a continuous and bijective function that maps a compact space to a Hausdorff space.

section 19 the product topology dbfin Nov 09 2022

The product topology on X is the topology generated by the basis consisting of $\prod U_\alpha$ where each U_α is an open subset or equivalently a basis element of X_α and all but finite number of U_α equal X_α . X with the product topology is called the product space.
