radiations or evolution in action we have just celebrated the darwin year with the double anniversary of his 200th birthday and 150th year of his masterpiece on the origin of species by means of natural selection in this work darwin established the factual evidence of biological evolution that species change over time and that new organisms arise by the splitting of ancestral forms into two or more descendant species however above all darwin provided the mechanisms by arguing convincingly that it is by natural selection as well as by sexual selection as he later added that organisms adapt to their environment the many discoveries since then have essentially con rmed and strengthened darwin s central theses with latest evidence for example from molecular genetics revealing the evolutionary relationships of all life forms through one shared history of descent from a common ancestor we have also come a long way to progressively understand more on how new species actually originate i e on speciation which remained darwin s mystery of m teries as noted in one of his earliest transmutation notebooks since speciation is the underlying mechanism for radiations it is the ultimate causation for the biological diversity of life that surrounds us

teacher education in the united states is changing to meet new policy demands for centering clinical practice and developing robust school university partnerships to better prepare high quality teachers for tomorrow s schools professional development schools pdss have recently been cited in national reports as exemplars of high quality school university partnerships in the clinical preparation of teachers according to the national association for professional development schools pdss have nine essentials that distinguish them from other school university collaborations but even with that quidance working across the boundaries of schools and universities remains messy complex and quite frankly hard that s why perhaps there is such diversity in school university partnerships for the last thirty years educators have been fascinated yet puzzled with how to build pdss clinically based teacher education in action cases from pdss addresses that perplexity by providing images of the possible in school university collaboration each chapter closely examines one of the napds nine essentials and then provides three cases from pdss that target that particular essential in this way readers can see how different pdss from across the

globe are innovating to actualize that essential in pds development the editors provide commentary addressing themes across the three cases each chapter ends with questions to start collaborative conversations and a field based activity meant to propel your pds work forward
