Transnational Identities 2004

this original work explores the increasingly important phenomenon of the formation of transnational identity considering the ongoing relevance of the european union the contributors ask a series of intriguing questions is a european identity possible how are the various types of european identity formed and maintained how are these identities linked to the process of

European integration examining the psychological, institutional and political mechanisms that encourage or impede identification with transnational groups. The book considers these theoretical questions in light of new evidence drawn from a rich body of primary research including field experiments in depth, interviews with elites and public opinion surveys brought together for the first time. Social psychologists, sociologists, political scientists and ethnographers share their theoretical and methodological perspectives in tackling the common issues surrounding the emergence of European as a political identity, paying special attention to the role of the institutions of the EU. The authors investigate the impact of neo-functional strategies and find that the processes of identity formation are far more complicated than can be explained by material and institutional factors alone. The authors engage in a fruitful dialogue about how much a European identity exists and how much it matters as they delve into the sources of disagreement and their implications.

Understanding EU Decision-Making 2016-02-04

This book presents in a concise and accessible way why the EU institutional system exists in its present form, how the EU fits into the world as a system of governance and who is involved in EU policy processes. It outlines the historical context which has shaped the EU system, gives a summary of the system's basic principles and structures and describes its actors, procedures and instruments. The main theme is to show that EU decision making is not just a matter of action at some higher and separate level of them and us, but rather that it involves different forms of cooperation between European national and regional authorities as well as interaction between public and private actors. Numerous short case studies illustrate how people's day-to-day activities are affected by EU decisions and how individuals' concerns are represented in the decision-making process. The book provides insights and examples which will be very helpful for all students of European integration. It will also be a valuable resource for European citizens wishing to understand the basic realities and rationales as well as some of the dilemmas behind EU policy making.

The EU in the Global Investment Regime 2017-11-07

The European Union (EU) has emerged as a key actor in the global investment regime since the 1980s. At the same time, international investment policy and agreements which govern international investment liberalisation, treatment and protection through investor-to-state dispute settlement have become increasingly contentious in the European public debate. This book provides an accessible introduction to international investment policy and seeks to explain how the EU became an actor in the global investment regime. It offers a detailed analysis of the EU's participation in all major trade and investment negotiations since the 1980s and EU internal competence debates to identify the causes behind the EU's growing role in this policy domain. Building on principal-agent and historical-institutionalist models of incremental institutional change, the book shows that Commission entrepreneurship was instrumental in the emergence of the EU as a key actor in the global investment regime. It refutes business-centred liberal intergovernmental explanations which suggest that business lobbying made the member states accept the EU's growing role and competence in this domain. The book lends support to supranational and challenges intergovernmental thinking on European integration. This text will be of key interest to scholars, students and practitioners of European and regional integration, EU foreign relations, EU trade and international investment law, business lobbying and more broadly of international political economy.

The Ethos of Europe 2010-03-11

Can the EU become a just institution? Andrew Williams considers this highly charged political and moral question by examining the role of five salient values said to be influential in the governance and law of the Union: peace, the rule of law, respect for human rights, democracy and liberty. He assesses each of these as elements of an apparent institutional ethos and philosophy of EU law and finds that justice as a governing ideal has failed to be taken seriously in the EU. To remedy this condition, he proposes a new set of principles upon which justice might be brought more to the fore in the Union's governance by focusing on the realisation of human rights as a core institutional value. Williams argues that the EU can better define its moral limits so as to evolve as a more just project.
