Taxation in a Global Digital Economy 2017-10-04 a surprising and revealing look at what americans really believe about taxes conventional wisdom holds that americans hate taxes but the conventional wisdom is wrong bringing together national survey data with in depth interviews read my lips presents a surprising picture of tax attitudes in the united states vanessa williamson demonstrates that americans view taxpaying as a civic responsibility and a moral obligation but they worry that others are shirking their duties in part because the experience of taxpaying misleads americans about who pays taxes and how much perceived loopholes convince many income tax filers that a flat tax might actually raise taxes on the rich and the relative invisibility of the sales and payroll taxes encourages many to underestimate the sizable tax contributions made by poor and working people americans see being a taxpayer as a role worthy of pride and respect a sign that one is a contributing member of the community and the nation for this reason the belief that many americans are not paying their share is deeply corrosive to the social fabric the widespread misperception that immigrants the poor and working class families pay little or no taxes substantially reduces public support for progressive spending programs and undercuts the political standing of low income people at the same time the belief that the wealthy pay less than their share diminishes confidence that the political process represents most people upending the idea of americans as knee jerk opponents of taxes read my lips examines american taxpaying as an act of political faith ironically the depth of the american civic commitment to taxpaying makes the failures of the tax system perceived and real especially potent frustrations

Wills, Trusts, and Estates 2024 everyone concerned about the toxic effects of inequality must read this book robert b reich this is one of the most thought provoking books i have read on economic inequality in the us william julius wilson since the great recession most americans standard of living has stagnated or declined economic inequality is at historic highs but inequality s impact differs by race african americans net wealth is just a tenth

that of white americans and over recent decades white families have accumulated wealth at three times the rate of black families in our increasingly diverse nation sociologist thomas m shapiro argues wealth disparities must be understood in tandem with racial inequities a dangerous combination he terms toxic inequality in toxic inequality shapiro reveals how these forces combine to trap families in place following nearly two hundred families of different races and income levels over a period of twelve years shapiro s research vividly documents the recession s toll on parents and children the ways families use assets to manage crises and create opportunities and the real reasons some families build wealth while others struggle in poverty the structure of our neighborhoods workplaces and tax code much more than individual choices push some forward and hold others back a lack of assets far more common in families of color can often ruin parents careful plans for themselves and their children toxic inequality may seem inexorable but it is not inevitable america s growing wealth gap and its yawning racial divide have been forged by history and preserved by policy and only bold race conscious reforms can move us toward a more just society
