the paper provides estimates of the long run tax adjusted user cost elasticity of capital uce in a small open economy exploiting three sources of variation in canadian tax policy across provinces industries and years estimates of the uce with canadian data are less prone to the endogeneity problems arising

from the effects of tax policy changes on the interest rate or on the price of capital equipment reductions in the federal corporate income tax rate during the early 2000s for service industries but not for manufacturing which already benefited from a preferential tax rate contribute to the identification of the use to capture the long run relationship between the capital stock and the user cost of capital an error correction model ecm is estimated supplementary results are obtained from a distributed lag model in first differences dlm with the ecm our baseline use for machinery and equipment m_e is 1.312 the corresponding semi elasticity of the stock of m_e with respect to the metr is about 0.2 suggesting for example that a 5 percentage point reduction in the metr say from 15 to 10 percent would in the long run generate an increase of 1.0 percent in the stock of m_e the use for non residential construction is statistically insignificantly different from zero

states are the key to contemporary government reform efforts in the united states but we know very little about their relative

effectiveness at resource allocation and their actual capacity to absorb additional fiscal and managerial responsibilities this path breaking study examines state budget offices as institutional actors with special attention to the role of budget examiners drawing on empirical findings from field studies of eleven states in the american heartland the authors demonstrate how budgeting at the state level has become more policy oriented requiring complex decision making by budget analysts the incrementalist model of budgetary decision making thus gives way to a multiple rationalities model the authors illustrate the decision making model with the story of two office examiners who have distinctly different orientations as they begin their work and contrast the different decision nationalities that come into play for them at different points in a typical budget cycle the book includes a comprehensive bibliography of historical and modern writings on state budgeting operations activities and decision making state budgeting cycles and the state level policy development process

africa for the africans was the name given in africa to the extraordinary black social protest movement led by jamaican marcus mosiah garvey 1887 1940 volumes i vii of the marcus garvey and universal negro improvement association papers chronicled the garvey movement that flourished in the united states during the 1920s now the long awaited african

volumes of this edition volumes viii and ix and a forthcoming volume x demonstrate clearly the central role africans played in the development of the garvey phenomenon the african volumes provide the first authoritative account of how africans transformed garveyism from an external stimulus into an african social movement they also represent the most extensive collection of documents ever gathered on the early african nationalism of the inter war period here is a detailed chronicle of the spread of garvey s call for african redemption throughout africa and the repressive colonial responses it engendered volume viii begins in 1917 with the little known story of the pan african commercial schemes that preceded garveyism and charts the early african reactions to the unia volume ix continues the story documenting the establishment of unia chapters throughout africa and presenting new evidence linking garveyism and nascent namibian nationalism
