homeland security and context in the geographical dimensions of terrorism gdot cutter et al 2003 the first book after 9 11 to address homeland security and geography we developed several thematic research agendas and explored intersections between geographic research and the importance of context both geographical and political in relationship to the concepts of terrorism and security it is good to see that a great deal of new thought and research continues to flow from that initial research agenda as illustrated by many of the papers of this new book entitled geospatial technologies and homeland security research frontiers and future challenges context is relevant not only to understanding homeland security issues broadly but also to the conduct of research on geospatial technologies it is impossible to understand the implications of a homeland security strategy let alone hope to make predictions conduct meaningful modeling and research or assess the value and dangers of geospatial technologies without consideration of overarching political social economic and geographic contexts within which these questions are posed

this rockfall computer program which simulates rocks tumbling down a slope predicts the statistical distribution of speed and bounce height and can be used for locating and designing rockfall mitigation the model takes into account slope profile rebound and friction characteristics of the slope and spinning energy of the rocks spherical cylindrical and disk shaped rocks can be simulated at each impact the slope angle is randomly varied from the nominal value input by the user within the limit set by the maximum probable variation in the slope version 3 0 of the colorado rockfall simulation program is similar to version 2 1 in terms of the operating environment but additional statistical output has been added and the ability to use metric units has also been added this manual reflects version 3 0 input and output the model is recommended as a tool for geologist s and engineers responsible for analyzing and mitigating rockfall hazards technical report documentation page
