popular science gives our readers the information and tools to improve their technology and their world the core belief that popular science and our

readers share the future is going to be better and science and technology are the driving forces that will help make it better

Fairplay International Shipping Weekly

1981

it was big oil s nightmare moment and the dominoes began falling years before the well was drilled two decades ago british petroleum a venerable and storied corporation was running out of oil reserves along came a new ceo of vision and vast ambition john browne who pulled off one of the greatest corporate turnarounds in history bp bought one company after another and then relentlessly fired employees and cut costs it skipped safety procedures pumped toxic chemicals back into the ground and let equipment languish even while browne claimed a new era of environmentally sustainable business as his own for a while the strategy worked making bp one of the most profitable corporations in the world then it all began to unravel in felony convictions for environmental crimes and in one deadly accident after another employees and regulators warned that bp s problems unfixed were spinning out of control that another disaster bigger and deadlier was inevitable nobody was listening having reported on business and the energy industry for nearly a decade abrahm lustgarten uses interviews with key executives former government investigators and whistle blowers along with his exclusive access to bp s internal documents and emails to weave a spellbinding investigative narrative of hubris and greed well before the gulf oil spill
