Immanent Materialisms 2018-06-19 must a philosophy of life be materialist and if so must it also be a philosophy of immanence in the last twenty years or so there has been a growing trend in continental thought and philosophy and critical theory that has seen a return to the category of immanence through consideration of the work of thinkers such as giorgio agamben catherine malabou francois laruelle gilles deleuze and others this collection aims to examine the interplay between the concepts of immanence materialism and life particularly as this interplay can highlight new directions for political inquiry furthermore critical reflection on this constellation of concepts could also be instructive for continental philosophy of religion in which ideas about the divine embodiment sexual difference desire creation and incarnation are refigured in provocative new ways the way of immanence however is not without its dangers indeed it may be that with its affirmation something of importance is lost to material life could it be that the integrity of material things requires a transcendent origin precisely what are the metaphysical political and theological consequences of pursuing a philosophy of immanence in relation to a philosophy of life this book was originally published as a special issue of angelaki journal of the theoretical humanities

The Patient Will See You Now 2016-10-25 the essential guide by one of america s leading doctors to how digital technology enables all of us to take charge of our health a trip to the doctor is almost a guarantee of misery you ll make an appointment months in advance you ll probably wait for several hours until you hear the doctor will see you now but only for fifteen minutes then you ll wait even longer for lab tests the results of which you ll likely never see unless they indicate further and more invasive tests most of which will probably prove unnecessary much like physicals themselves and your bill will be astronomical in the patient will see you now eric topol one of the nation s top physicians shows why medicine does not have to be that way instead you could use your smartphone to get rapid test results from one drop of blood monitor your vital signs both day and night and use an artificially intelligent algorithm to receive a diagnosis without having to see a doctor all at a small fraction of the cost imposed by our modern healthcare system the change is powered by what topol calls medicine s gutenberg moment much as the printing press took learning out of the hands of a priestly class the mobile internet is doing the same for medicine giving us unprecedented control over our healthcare with smartphones in hand we are no longer beholden to an impersonal and paternalistic system in which doctor knows best medicine has been digitized topol argues now it will be democratized computers will replace physicians for many diagnostic tasks citizen science will give rise to citizen medicine and enormous data sets will give us new means to attack conditions that have long been incurable massive open online medicine where diagnostics are done by facebook like comparisons of medical profiles will enable real time real world research on massive populations there s no doubt the path forward will be complicated the medical establishment will resist these changes and digitized medicine inevitably raises serious issues surrounding privacy nevertheless the result better cheaper and more human health care will be worth it provocative and engrossing the patient will see you now is essential reading for anyone who thinks they deserve better health care that is for all of us

Philosophy in Ireland 2019-08-29 this volume presents an overview of various aspects of the quite diverse philosophical developments that have taken place in ireland both past and present with contributions by some of the leading thinkers in their field this book is based although not exclusively so on papers given at a conference held at maynooth university ireland in 2012 to celebrate the 50th

anniversary of the irish philosophical society rather than treating philosophy in ireland in a systematic and comprehensive way the contributions give the reader a glimpse of the state of philosophy in ireland today they show that from the beginning and throughout the centuries the philosophical tradition in ireland has been characterised by dialogue this dialogical aspect of irish philosophising remains alive today the book demonstrates how this engagement encompasses the past as interlocutor as well as interactions with the philosophical debates that take place outside of ireland both on the continent and within the anglo american tradition the volume puts forward a strong argument that the future of philosophy in ireland should not move towards an ever greater specialisation thereby resulting in the isolation and impoverishment of individual philosophical traditions rather it argues that the different traditions should remain and should engage in dialogue with each other with their philosophical and intellectual past and stay steadfastly connected with the society around them
