Recent Awards in Engineering 2008-09 this book examines the challenges posed to Australian copyright law by streaming from the end user perspective it compares the Australian position with the European Union and United States to draw lessons from them regarding how they have dealt with streaming and copyright by critically examining the technological functionality of streaming and the failure of copyright enforcement against the masses it argues for strengthening end user rights the rising popularity of streaming has resulted in a revolutionary change to how digital content such as sound recordings cinematographic films and radio and television broadcasts is used on the internet superseding the conventional method of downloading using streaming to access digital content has challenged copyright law because it is not clear whether end user acts of streaming constitute copyright infringement these prevailing grey areas between copyright and streaming often make end users feel doubtful about accessing digital content through streaming it is uncertain whether exercising the right of reproduction is appropriately suited for streaming given the ambiguities of embodiment and scope of substantial part conversely the fair dealing defence in Australia cannot be used aptly to defend end users acts of streaming digital content because end users who use streaming to access digital content can rarely rely on the defence of fair dealing for the purposes of criticism or review news reporting parody or satire or research or study when considering a temporary copy exception end users are at risk of being held liable for infringement when using streaming to access a website that contains infringing digital content even if they lack any knowledge about the content's infringing nature moreover the grey areas in circumventing geo blocking have made end users hesitant to access websites through streaming because it is not clear whether technological protection measures apply to geo blocking end users have a severe lack of knowledge about whether they can use circumvention methods such as virtual private networks to access streaming websites without being held liable for copyright infringement despite the intricacies between copyright and access to digital content the recently implemented website blocking laws have emboldened copyright owners while suppressing end users access to digital content this is because the principles of proportionality and public interest have been given less attention when determining website blocking injunctions

Streaming and Copyright Law 1914 this is the first book combining research on the global environment catastrophic risks and economic theory and policy modern economic theory originated in the middle of the twentieth century when industrial expansion coupled with population growth led to a voracious use of natural resources and global environmental concerns it is uncontested that for the first time in recorded history humans dominate the planet changing the planet's atmosphere its bodies of water and the complex web of species that makes life on earth this radical change in circumstances led to rethinking of the foundations of human organization and in particular the industrial economy and the economic theory behind it this book brings together new approaches on multiple levels environmental sustainability requires rethinking in terms of economic theory and policy as well as the considerations of catastrophic risk and extremal events leading experts address questions of economic governance risk management policy decision making and distribution across time and space

Professional C# 7 and .NET Core 2.0 2007 examining the science of stream restoration rebecca lave argues that the neoliberal emphasis on the privatization and commercialization of knowledge has fundamentally changed the way that science is funded organized and viewed in the united states stream restoration science and practice is in a startling state the most widely respected expert in the field dave rosgen is a private consultant with relatively little formal scientific training since the mid 1990s many academic and federal agency based scientists have denounced rosgen as a charlatan and a hack despite this rosgen's natural channel design approach classification system and short course series are not only accepted but are viewed as more legitimate than academically produced knowledge and training rosgen's methods are now promoted by federal agencies including the environmental protection agency the u.s. forest service the u.s. fish and wildlife service and the natural resources conservation service as well as by resource agencies in dozens of states drawing on the work of pierre bourdieu lave demonstrates that the primary cause of rosgen's success is neither the method nor the man but is instead the assignment of a new legitimacy to scientific claims developed outside the academy concurrent with academic scientists decreasing ability to defend their turf what is at stake in the rosgen wars argues lave is not just the ecological health of our rivers and streams but the very future of environmental science

2007 International Conference on Parallel Processing 2017-05-18 when thinking about relations between europe and russia international relations scholars focus on why conflict has replaced cooperation the geostrategic debate excludes the possible coexistence of cooperation and conflict tracking the evolution of conflict and cooperation patterns in three zones of contact estonia kaliningrad and moldova between 1991 and 2016 this edited volume argues that although the standard narrative remains compelling local patterns of cooperation and conflict are partly autonomous from the geostrategic level to account for the coexistence of cooperation and conflict the first chapter elaborates a theoretical proposition distinguishing fluid rigid and disputed symbolic boundaries which have different impacts on the ground the subsequent chapters address distinct dimensions of euro russian relations paying attention to local reality in estonia moldova ukraine or kaliningrad different sectors from energy to peoples movement and across institutional contexts such as the eu and nato

they confirm that the standard narrative holds in most cases but also that euro russian relations vary in crucial ways according to the interests and representations of actors immersed in specific geopolitical fields despite a deterioration of geostrategic relations between europe and russia since the end of the soviet union cooperation and conflict between europe and russia explores the intriguing coexistence of conflict and cooperation at the local level and across sectors and institutions the chapters in this book were originally published as a special issue of the journal east european politics
