*Rick Steves France 2017* 2017-01-17 the two decades before world war ii were some of the most unsettled in modern history from versailles to mers el kébir examines one of the most unlikely and perhaps least studied relationships to form during that turbulent era the alliance of the royal navy and the french fleet beginning from a global perspective and gradually narrowing george e melton brings new insights to the diplomacy that led to this often strained cooperation and reinterprets some of the most important events of early world war ii by the mid 1930s the royal navy and french fleet had overextended themselves with global defense commitments owing mainly to the collapse of the world war alliances and to an ominous shift in the balance of world naval power to maximize their power england and france combined their assets in a naval alliance successful in keeping both italy and japan neutral early in the war that alliance brought the french and english success against german surface raiders and u boat operations in the atlantic the two powers were on such good terms that in 1939 during a joint operation to the north of scotland hms hood and its escorts served for a week under the command of vice admiral marcel gensoul french commander of the dunkerque afterward the british seamen affectionately referred to the dunkerque as the friend of the hood still the union was not an altogether happy one the global defense imperatives of the admiralty frustrated the regional ambitions of the rue royale the union ultimately came to a violent end when the british attacked the french squadron at mers el kébir in the summer of 1940 after france had signed an armistice with germany what followed was a poorly constructed cover up to mask the operation as a regrettable but necessary action melton s study challenges this popular myth thoroughly researched and documented from versailles to mers el kébir concludes that the operation was a disastrous failure

*From Versailles to Mers el-Kébir* 2015-10-15 r g collingwood s prolific works have shaped the debate about the nature of civilisation and its status as an ideal governing art morality and social and political existence as one of the few philosophers to subject civilisation and barbarism to close analysis r g collingwood was acutely aware of the interrelationship between philosophy and history in peter johnson s highly original work r g collingwood

and the second world war facing barbarism johnson combines historical biographical and philosophical discussion in order to illuminate collingwood s thinking and create the first in depth analysis of r g collingwood s responses to the second world war peter johnson examines how r g collingwood s responses to the war developed from his early rejection of appeasement as a policy for dealing with hitler s germany through his view of britain s prosecution of the war once the battle with nazism had been joined and finally to his picture of a future liberal society in which civility is its overriding ideal

**Rick Steves Tour: Versailles (Enhanced)** 2019-07-30 designed to secure a lasting peace between the allies and germany the versailles settlement soon came apart at the seams in after the versailles treaty an international team of historians examines the almost insuperable challenges facing victors and vanquished alike after the ravages of ww1 this is not another diplomatic history instead focusing on the practicalities of treaty enforcement and compliance as western germany came under allied occupation and as the reparations bill was presented to the defeated and bankrupt germans it covers issues such as how did the allied occupiers conduct themselves and how did the germans respond were reparations really affordable and how did the reparations regime affect ordinary germans what lessons did post ww2 policymakers learn from this earlier reparations settlement the fraught debates over disarmament as german big business struggled to adjust to the sudden disappearance of arms contracts and efforts were made on the international stage to achieve a measure of global disarmament the price exacted by the redrawing of frontiers on germany s eastern and western margins as well as the gentler impact of the peace settlement on identity in french flanders this book was previously published as a special issue of diplomacy and statecraft

*After the Versailles Treaty* 2013-09-13 developed just after the close of the civil war the springfield gas machine was a unique commercial and domestic gas lighting system marketed for use in homes and businesses outside of a city s gas works the self contained unit was perfectly suited to accommodate an expanding rural and suburban u s landscape as middle and upper class american families were looking to find simplicity in the countryside without losing any modern comforts of the city industries too were looking for a means to operate more efficiently and implement longer work hours for various production operations perhaps more important owners of the springfield system could retain control of their light production during a time when corporations were reaping large benefits from their monopolistic hold over municipal gas works in addition to detailing preserved springfield systems across the country donald w linebaugh uses newspapers and magazine articles advertisements patents and even mail order catalogs to tell the story of this one of a kind unit the gilbert and barker manufacturing company s innovative business plan established them as a leader in the manufacture of gas lighting devices by taking gasoline from an oft discarded byproduct of refining crude oil to a

viable fuel source the company paved the way for other gas powered appliances to improve household management strategies and industrial production in capturing the pre automobile market for gasoline gilbert and barker attracted the attention of the standard oil trust presaging the oil industry dominance over gasoline production that continues today the story of the springfield gas machine ends in the early twentieth century as the advent of electricity proved more available to the masses with considerably less expense however gas lighting was for its time a major innovation in domestic and commercial lighting and it changed daily life and social behaviors in the late nineteenth century as the comforts of home became a reality for suburban and rural americans
