A Future for Peacekeeping? 2016-07-27 this study challenges the easy assumption that peacekeeping as we ve known it in the past will be the pill for every ill in the future a new world order means new types of conflict breaking out almost anywhere in a world that is more volatile and less predictable than before contributors to this volume argue that we need to get back to basics that there are sobering lessons to be learnt from somalia the lebanon and cambodia that we need to ask some fundamental questions can peacekeeping be reformed or must it be totally reinvented are soldiers the best peacekeepers and if not who should replace them

*Men, Militarism, and UN Peacekeeping* 2004 in this important controversial and at times troubling book sandra whitworth looks behind the rhetoric to investigate from a feminist perspective some of the realities of military intervention under the un flag whitworth contends that there is a fundamental contradiction between portrayals of peacekeeping as altruistic and benign and the militarized masculinity that underpins the group identity of soldiers examining evidence from cambodia and somalia she argues that sexual and other crimes can be seen as expressions of a violent hypermasculinity that is congruent with militarized identities but entirely incongruent with missions aimed at maintaining peace she also asserts that recent

efforts within the UN to address gender issues in peacekeeping operations have failed because they fail to challenge traditional understandings of military conflict and women. This unsettling critique of UN operations, which also investigates the interplay between gender and racial stereotyping in peacekeeping, has the power to change conventional perceptions with considerable policy implications.

**The Economics of UN Peacekeeping** 2011-07-25 Peacekeeping is a security concept that is very representative of the current interventionism, multilateralism, human rights, and humanitarian ideas. UN peacekeeping plays an important role in international security and includes various activities that go beyond the original roles assigned to UN armed forces, e.g., humanitarian aid, election supervision, disarmament, mine clearance, civilian protection, and peacebuilding. The problem is to define the economic efficiency of these operations and to develop some recommendations in the context of an economic globalization process. Although UN peacekeeping has shortcomings, it must be considered essential for organizing and defending the world politico-economic order. UN peacekeeping is a political activity, but its production strongly depends on nations' economic considerations. Governments make political decisions that also take into account the economic gains they expect to obtain from their contribution to any specific mission with low means and inadequate strategies to meet the challenges. UN peacekeeping must pay particular attention to resolving the problems of free riding and of prisoner's dilemma in contributions that delay deployments and create significant financial problems. Understanding how peacekeeping can be most cost effectively carried out while considering the importance of legitimacy in interventions is essential. This book believes that regional organizations can ease the UN's financial responsibility by managing conflicts in their regions, but to be most effective they must involve the UN in their interventions. This book also emphasizes UN peacekeeping trust funds as the key to better financial effectiveness. It strongly recommends that NATO be empowered by the UN with the role of global peace police and proposes the establishment of a UN high-ranking team of international
