inhaltsangabe abstract this thesis presents a control algorithm for semi active suspensions to reduce the braking distance of passenger cars active shock absorbers are controlled and used to influence the vertical dynamics during abs controlled full braking in today s series cars the active shock absorbers are switched to a passive damping usually hard damping during abs braking several approaches to reduce oscillations of vertical dynamic tire forces are known implemented and some of them tested in non braking situations refer to yi valà ek and nouillant the approach presented in this paper goes a step further by connecting the vertical with the longitudinal dynamics to influence the vertical dynamics a switching control logic called minimax controller is used it is named after the fact that it changes only from soft to hard damping and vice versa a control quantity was identified that connects the vertical dynamics with the longitudinal

the aim of this book is to provide readers with a wide overview of the main healthcare associated infections caused by bacteria and fungi able to grow as biofilm the recently acquired knowledge on the pivotal role played by biofilm growing microorganisms in healthcare related infections has given a new dynamic to detection prevention and treatment of these infections in patients admitted to both acute care hospitals and long term care facilities clinicians hygienists and microbiologists will be updated by leading scientists on the state of art of biofilm based infections and on the most innovative strategies for prevention and treatment of these infections often caused by emerging multidrug resistant biofilm growing microorganisms

since the discovery of the bone morphogenetic proteins bmps more than 15 years ago there has been an unpredicted explosion of both basic scientific discoveries and clinical reports on their use from institutions all over the world the potent efficacy of bmps in almost all crucial developmental events as well as during regeneration of various organs such as bone kidney brain liver heart etc has positioned bmps at the center of scientific interest many of these aspects are covered in this new pir volume their role in development biology signal transduction kidney regeneration ens functions craniofacial skeleton reconstruction joint and cartilage repair long bone non unions and acute fractures and spinal fusion is reviewed by experts in the field for the first time the role of bmps in carcinogenesis has been reviewed to provide a rationale for applying their biology in patients with bone tumors the optimism resulting from safe and successful treatment with bmps for various skeletal malformations of more than 10 000 patients worldwide has opened new avenues for exploring other indications for their use the next big challenge for bringing bmps to the benefit of mankind is in regenerating articular cartilage defects and rescuing patients with acute and chronic renal failure the volume editors thank all authors for the rapid preparation of their chapters in order that the book remains up to date for readers with specific interest in the field of regenerative medicine the important contribution of mrs morana and mr
