the dynamics for any moves for political independence in the 21st century are very different from those of the 20th the aspirations of former colonies to independence are grinding to a halt the rationale for selfdetermination is increasingly driven by strategic and pragmatic economic arguments and not so much by nationalist appeals meanwhile creative governance fiscal vicissitudes and membership of supra national bodies have ushered in examples of sovereign states that approximate suzerain entities are independence movements active today aspiring to a different kind of sovereignty from their 20th century predecessors one that secures autonomy at home but which maintains a special relationship with a larger richer country this collection critically reviews the origins policies and aspirations of independence movements from the world s subnational island jurisdictions where a distinct and separate geography tends to facilitate the emergence of an equally distinct political and cultural identity these island territories are the world s top candidates for achieving sovereign status and yet various factors are preventing them from making the final push towards independence this book was originally published as a special issue of commonwealth and comparative politics
