this book covers the various aspects of the development of an integrated product and process modelling system using advanced computer technologies it describes languages and methodologies for developing an information reference model system architectures a link with emerging new standards such as iso step and cim osa and a new approach for the definition of model semantics it discusses practical aspects of the usage and integration of computer aided design planning and production systems and shows how the reference model can be applied concrete practical examples are given for two demonstration parts a sheet metal part and a ship propeller blade much attention has been devoted to making the subject matter easy to understand for a wide audience the reference model is presented in easy to grasp chunks in a graphical informal way and many figures support the text the reader should gain a clear impression of the various technical aspects of cim systems using modern techniques corresponding to emerging new standards aspects of future systems are also included

this fascinating book provides a stimulating introduction to analog electronics by analysing the design and construction of a radio transceiver essential theoretical background is given along with carefully designed laboratory and homework exercises the author begins with a thorough description of basic

electronic components and simple circuits and goes on to describe the key elements of radio electronics including filters amplifiers oscillators mixers and antennas laboratory exercises lead the reader through the design construction and testing of a popular radio transceiver the norcal 40a a diskette containing the widely known circuit simulation software puff is included in the book this was the first book to deal with elementary electronics in the context of radio it can be used as a textbook for introductory analog electronics courses for more advanced undergraduate classes on radio frequency electronics and will also be of great interest to electronics hobbyists and radio enthusiasts
